The Return of Sacred Architecture Herbert Bangs, 2006-11-14 An inspirational call for a return to the tenets of traditional architecture as a remedy for the dehumanizing standards of modern architecture Explains how modern architecture is emblematic of our current estrangement from the spiritual principles that shaped humanity's greatest civilizations Reveals how the ancient laws of sacred proportion and harmony can be restored The ugly buildings that characterize the modern landscape are inferior not only to the great cathedrals of medieval Europe and the temples of

ancient Egypt and Greece but even to lesser buildings of the more recent past The great masterworks of our ancestors spoke to humanity s higher nature Architect Herbert Bangs reveals how today s dysfunctional buildings bring out the worst in humanity reinforcing that which is most base within us He shows how through the ancient laws of proportion and number architecture once expressed the harmonious relationship between man and the cosmos In early times the architect worked within a sacred and esoteric tradition of creating structures through which human beings could gain insight into the nature of the divine reality Today that tradition has been abandoned in favor of narrowly defined utilitarian principles of efficiency and economy In *The Return of Sacred Architecture* Bangs provides the key to freeing architecture from the crude functionality of the twentieth century the architects of the modern human landscape must find the deep felt connection to the cosmos that guided the inner lives of those who built the temples of the past The form of their buildings will then reflect the sacred patterns of geometry and proportion and bring forth greater harmony in the world **Victorian Visions of**

Manifestoes and Transformations in the Early Modernist City Professor Christian Hermansen Cordua,2012-11-28 The industrialization of the nineteenth century European city facilitated developing conceptions of the model city and allowed for large scale urban transformations The urban discourse in the latter half of the nineteenth century was consequently dominated by a dialectic exchange between the ideal and the practical a debate played out in the formation of the modern metropolis *Manifestoes and Transformations* is the first work to deal with urban utopias and their relationship with actual urban interventions Bringing together a carefully chosen wide ranging team of experts the book provides a broad contextual exploration of the ideas and urban practices which are the foundations of our conception of the contemporary city As such it is a valuable resource for students interested in the formation of the modernist city [John McAndrew's Modernist Vision](#)

Mardges Bacon,2018-11-06 John McAndrew s *Modernist Vision* tells the compelling story of the architect scholar and curator John McAndrew who played a key role in redefining modernism in the United States from the 1930s onward The designer of the Vassar College Art Library arguably the first modern interior on a college campus and the curator of architecture at the Museum of Modern Art in New York from 1937 to 1941 McAndrew was instrumental in creating a distinct and innovative aesthetic that bridged the European modernist lineage and American regional vernacular Providing a fascinating glimpse into McAndrew s life his associations with important architects and artists and the historical context that shaped his work this book is a thoroughly researched testament to a man who left a powerful mark on the evolution of American architecture

Dwell ,2009-09 At *Dwell* we re staging a minor revolution We think that it s possible to live in a house or apartment by a bold modern architect to own furniture and products that are exceptionally well designed and still be a regular human being

We think that good design is an integral part of real life And that real life has been conspicuous by its absence in most design and architecture magazines
