Cline, 2018-11-06 From the bestselling author of *1177 B.C.* a comprehensive history of archaeology from its amateur beginnings to the cutting edge science it is today In 1922 Howard Carter peered into Tutankhamun's tomb for the first time the only light coming from the candle in his outstretched hand Urged to tell what he was seeing through the small opening he had cut in the door to the tomb the Egyptologist famously replied I see wonderful things Carter's fabulous discovery is just one of the many spellbinding stories told in *Three Stones Make a Wall* Written by Eric Cline an archaeologist with more than thirty seasons of excavation experience this book traces the history of archaeology from an amateur pursuit to the cutting edge science it is today by taking the reader on a tour of major archaeological sites and discoveries Along the way it addresses the questions archaeologists are asked most often How do

you know where to dig How are excavations actually done How do you know how old something is Who gets to keep what is found Taking readers from the pioneering digs of the eighteenth century to today's exciting new discoveries *Three Stones Make a Wall* is a lively and essential introduction to the story of archaeology *Missing Pieces* Robert A. Baker, 1992-05 Readers wishing to investigate paranormal claims can learn how the professionals do it *Missing Pieces* is filled with practical information on checking out every type of mysterious anomaly including UFO sightings ghost hauntings psychic feats and other weird events This is a complete handbook featuring tactics and techniques you can use immediately to get at the truth Learn how to conduct investigations interrogate witnesses recognize deception and use the mental and electronic tools of the trade for ghostbusting Uncover the tricks used by those who say they can heal or influence behavior using only the power of their minds Expose those who allege that they were selected by gods or extraterrestrials to bring messages to humankind Baker and Nickell also address why otherwise intelligent people often accept paranormal claims without question and how the investigator can use the media to spread the truth **Debunk It! Fake News Edition** John Grant, 2019-09-03 We live in an era of misinformation much of it spread by authority figures including politicians religious leaders broadcasters and of course apps and websites In this second edition author John Grant uses ripped from the headlines examples to clearly explain how to identify bad evidence and poor arguments He also points out the rhetorical tricks people use when attempting to pull the wool over our eyes and offers advice about how to take these unscrupulous pundits down Updated to include a chapter on fake news *Debunk It* serves as a guide to critical thinking for young readers looking to find some clarity in a confusing world

Ethnographic Archaeologies Quetzil Castañeda, Christopher N. Matthews, 2008-02-08 Ethnographic archaeology has emerged as a form of inquiry into archaeological dilemmas that arise as scholars question older more positivistic paradigms *Ethnographic Archaeologies* describes diverse methods objectives and rationalities currently employed in the making of engaged and collaborative archaeological research The contributors to this volume for example understand ethnographic archaeology variously as a means of critical engagement with heritage stakeholders as the basis of public policy debates as a critical archaeological study of ethnic groups as the study of what archaeology actually does as opposed to what researchers often think they are doing in excavations and surveys and as a foundation for transnational collaborations among archaeologists What keeps the term ethnographic archaeology coherent and relevant is the consensus among practitioners that they are embarking on a new archaeological path by attempting to engage the present directly and fundamentally
