

8. Avoid making turns at high speed.
9. When manoeuvring the baler, always be aware and conscient of its size.

Field operation

1. Do not work around the machine wearing loose garments that could get caught in the moving parts. Check that all rotating parts connected to the PTO shaft are properly guarded.

2. Avoid using the machine in unsuitable crop and weather conditions. It is better to stop work temporarily rather than operating in such conditions.
3. Prior to operating the baler check that all guards and covers provided are properly fitted and secured. Also make sure that all transmission parts are correctly guarded.
4. Do not attempt to operate or manoeuvre the baler, unless sitting in the tractor seat.
5. Never allow anyone to ride on the machine or the tractor.

6. Keep the children away from and off the baler at all times.
7. Prior to engaging the PTO, always make sure there are no persons or obstacles nearby. Warn bystanders by sounding the horn three times.
8. Do not make tight turns with the PTO under a heavy load to avoid damage to the PTO joints and transmission shaft.
9. Always operate the baler at a safe speed in accordance with the type of ground. On uneven ground, proceed with the utmost caution to ensure proper stability.
10. When operating on gradients do not drive too fast, especially when turning.
11. Use extreme caution when operating with the wheels close to the edge of a ditch or a steeply dropping embankment.
12. Do not enter the area between the tractor wheels and the machine when the tractor engine is running.
13. Keep hands, feet and/or garments away from moving parts. Check that all transmission parts are correctly guarded.
14. Never attempt to check or to adjust chain tension while the baler is running.
15. Never attempt to clear crop or other foreign matter from the pick-up whilst the machine is running. Such imprudence could cost you your life or limb. In the event of a blockage, always disengage the PTO, switch off the tractor engine and apply the flywheel brake first. Wait until the machine has stopped completely before trying to unplug.
