is violent And its violence is not distributed equally stark racial disparities persist despite decades of efforts to address them
Amid public outcry and an ongoing crisis of police legitimacy there is pressing need to understand not only how police
perceive and use violence but also why With unprecedented access to three police departments and drawing on more than
100 interviews and 1 000 hours on patrol The Danger Imperative provides vital insight into how police culture shapes officers
perception and practice of violence From the front seat of a patrol car it shows how the institution of policing reinforces a
cultural preoccupation with violence through academy training departmental routines powerful symbols and officers street

and officer safety Nonetheless existing patterns of systemic disadvantage funnel police hyperfocused on survival into poor

perpetuates enduring inequalities in police violence A trailblazing on the ground account of modern policing this book shows
that violence is the logical consequence of an institutional culture that privileges officer survival over public safety

Astonishing the Wild Pigs Lucien F. Trueb, 2015-02-17 A hydraulic machine for astonishing wild pigs was one of the many technological highlights the author encountered in the course of his career as a research scientist and science writer. Writing a book about them never taking more or less than two printed pages for each of 146 subjects was a very special challenge. The book covers fundamentally important achievements of technology that directly impacted mankind or even profoundly changed it. Many of those highlights are quite new; at least one of them, power generation by nuclear fusion, is not available yet. But particularly ingenious things dating way back were also included as they are the base of our technical civilization. Good examples are ceramics as well as copper, bronze, and iron. Whole periods of history have been named for the latter three. The analog computer of Antikythera used for stellar navigation was made some 2100 years ago; gunpowder was used in China as early as 1044 A.D. the astronomical clock in the Strasbourg cathedral was built in the 14th century. On the other hand, Theodor W. Hänsch and John L. Hall were granted a Nobel Prize in 2005 for a discovery that brought us extremely accurate optical clocks. And the Smartphone was a 2007 breakthrough; hundreds of millions of them have been sold since then. The basic concept of describing and explaining major technological highlights to non-scientists with just 800 words was inspired by the column 'Inventions' fifty years later in the Swiss daily *Neue Zürcher Zeitung* (NZZ) to which the author contributed on a regular basis since 2007. The column was later renamed 'Achievements of Technology' no more time limits. Many of the book chapters were taken from those sources, updated, edited, and translated into English. Other sources were articles the author wrote for various newspapers and magazines. However, many highlights of technology were researched and written specifically for this book. Reading it is both fun and highly instructive.

A gritty action-packed adrenaline rush. Alan McDermott. Taking a life isn't hard when you've already given your own. A growing number of relentless adversaries including Triads baying for his blood and the mysterious organisation known only as the Syndicate determined to keep the truth buried.
