**The Cassowary's Revenge** Donald Tuzin, 1997-09-02 Donald Tuzin first studied the New Guinea village of Ilahita in 1972 When he returned many years later he arrived in the aftermath of a startling event the village s men voluntarily destroyed their secret cult that had allowed them to dominate women for generations The cult s collapse indicated nothing less than the death of masculinity and Tuzin examines the labyrinth of motives behind this improbable self devastating act The villagers mythic tradition provided a basis for this revenge of Woman upon the dominion of Man and remarkably Tuzin himself became a principal figure in its narratives The return of the magic bearing youngest brother from America had been prophesied and the villagers believed that Tuzin s return from the dead signified a further need to destroy masculine traditions The

Cassowary s Revenge is an intimate account of how Ilahita s men and women think emote dream and explain themselves Tuzin also explores how the death of masculinity in a remote society raises disturbing implications for gender relations in our own society In this light Tuzin s book is about men and women in search of how to value one another and in today s world there is no theme more universal or timely

**Pelletier** Stephanie Anderson, 2018-09-01 This book tells the story of a French cabin boy Narcisse Pelletier and his life with the Uutaalnganu people of north east Cape York from 1858 to 1875 Even though it is all but forgotten in Australia and in France is known only in its broad outlines Pelletier s story rivals that of the famous William Buckley both as a tale of human survival and as an enthralling and accessible ethnographic record Narcisse Pelletier from the village of Saint Gilles sur Vie was fourteen years old when the Saint Paul was wrecked near Rossel Island off New Guinea in 1858 Leaving behind more than 300 Chinese labourers recruited for the Australian goldfields believed to have been subsequently massacred by the Rossel Islanders the ship s captain and crew including the cabin boy escaped in a longboat After a gruelling voyage across the Coral Sea they landed near Cape Direction on Cape York where Pelletier found himself abandoned when the boat sailed off without him He was rescued by an Aboriginal family and remained with them as a member of their clan until 1875 when he was sighted by the crew of a pearling lugger Rescued against his will Pelletier was conveyed to Sydney and then repatriated to France The

author Stephanie Anderson came across Pelletier's story by chance in an old French anthropological journal. As she started researching it, her fascination with the story grew. She found that Pelletier had left an account of his experiences first published in 1876 that had never been translated into English. Now for the very first time this remarkable story is available to read in English, complemented by an ethnographic commentary by anthropologist Athol Chase and an in-depth introduction by Anderson. Pelletier's *The Forgotten Castaway of Cape York* is required reading for anyone with an interest in Australian history, anthropology, or the intriguing world of pre-colonial Aboriginal life.

*Animals That Refused to Be Tamed Part-3*  
Arven Shade, 2025-06-07 This book series explores the untamed lives of 100 wild animals that resist human control, revealing how their instinct, intelligence, and resilience enable them to live freely. Each chapter offers a detailed yet accessible portrait of a unique species, describing its physical traits, habitat, behavior, and survival strategies. More than just facts, these stories celebrate resistance to captivity, whether through clever escape, camouflage, or strong social bonds. The book aims to inspire respect and empathy for wild creatures while highlighting the urgent need for conservation in a rapidly changing world. From tool-using chimpanzees to elusive pangolins, each account shows not only how animals adapt but also how they mirror aspects of human life. Part of a four-book series, it offers a powerful call to protect nature and understand our shared connection to the wild. Written in clear, engaging prose, it invites readers of all ages to rediscover the beauty of living untamed.

*Birdology*  
Sy Montgomery, 2011-08-04 Meet the ladies, a flock of smart, affectionate, highly individualistic chickens who visit their favorite neighbors, devise different ways to hide from foxes, and mob the author like she's a rock star. In these pages, you'll also meet Maya and Zuni, two orphaned baby hummingbirds who hatched from eggs the size of navy beans and who are little more than air bubbles fringed with feathers. Their lives hang precariously in the balance, but with human help, they may one day conquer the sky. Snowball is a cockatoo whose dance video went viral on YouTube and who's now teaching schoolchildren how to dance. You'll meet Harris's hawks named Fire and Smoke. And you'll come to know and love a host of other avian characters who will change your mind forever about who birds really are. Each of these birds shows a different and utterly surprising aspect of what makes a bird a bird, and these are the lessons of *Birdology*: that birds are far stranger, more wondrous, and at the same time more like us than we might have dared to imagine. In *Birdology*, beloved author of *The Good Good Pig*, Sy Montgomery explores the essence of the otherworldly creatures we see every day. By way of her adventures with seven birds, wild, tame, exotic, and common, she weaves new scientific insights and narrative to reveal seven kernels of bird wisdom. The first lesson of *Birdology* is that no matter how common they are, birds are individuals, as each of Montgomery's distinctive ladies clearly shows. In the leech-infested rain forest of Queensland, you'll come face-to-face with a cassowary, a 150-pound, man-tall, flightless bird with a helmet of bone on its head and a slashing, razor-like toenail with which it occasionally eviscerates people, proof that birds are dinosaurs. You'll learn from hawks that birds are fierce, from pigeons how birds find their way home, from parrots what it means that birds can talk, and from 50,000 crows who moved into a

small city s downtown that Birds Are Everywhere They are the winged aliens who surround us Birdology explains just how very other birds are Their hearts look like those of crocodiles They are covered with modified scales which are called feathers Their bones are hollow Their bodies are permeated with extensive air sacs They have no hands They give birth to eggs Yet despite birds and humans disparate evolutionary paths we share emotional and intellectual abilities that allow us to communicate and even form deep bonds When we begin to comprehend who birds really are we deepen our capacity to approach understand and love these otherworldly creatures And this ultimately is the priceless lesson of Birdology it communicates a heartfelt fascination and awe for birds and restores our connection to these complex mysterious fellow creatures

*Tree Leaf Talk* James F. Weiner, 2021-01-07 This is the first book to explore the relationship between Martin Heideggers work and modern anthropology Heidegger attracts much scholarly interest among social scientists but few have explored his ideas in relation to current anthropological debates The disciplines modernist foundations the nature of cultural constructionism and of art even what an anthropology of art must include are all informed and illuminated by Heideggers work The author argues that many contemporary anthropologists in their concern to return subjectivity and voice to their interlocutors neglect to recognize that language and other representational practices conceal the world and human subjectivity as much as reveal it The author also suggests that Heideggers critique of western technology provides the basis for a return to anthropologys sociological foundations Emerging from over ten years of original research and drawing on a rich knowledge of Australian and Melanesian ethnography this book reassesses the underlying framework of modern and particularly visual anthropology Innovative and provocative it will be of interest to all anthropologists philosophers and students of art and culture
