Coordination: Neural, Behavioral and Social Dynamics Armin Fuchs, Viktor K. Jirsa, 2007-12-11 One of the most striking features of Coordination Dynamics is its interdisciplinary character The problems we are trying to solve in this field range from behavioral phenomena of interlimb coordination and coordination between stimuli and movements perception action tasks through neural activation patterns that can be observed during these tasks to clinical applications and social behavior It is not surprising that close collaboration among scientists from different fields as psychology kinesiology neurology and even physics are imperative to deal with the enormous difficulties we are facing when we try to understand a system as complex as the human brain The chapters in this volume are not simply write ups of the lectures given by the experts at the meeting but are written in a way that they give sufficient introductory
