Hobday, 2018-02-03 Excerpt from Anaesthesia Narcosis of Animals and Birds The progress of anaesthetics in veterinary surgery has not been as rapid as it ought to have been and it is in the hope that a small textbook specially devoted to the subject may be helpful in this direction that this contribution is brought before the notice of the profession That it may be a guide to the student in the selection of an anaesthetic for his future patients is the hope of the author and if it is also found of value as a work of reference for the busy practitioner and thus ameliorates pain in the animal world the time devoted to the deductions and opinions brought forward many of them quite contrary to the usual teaching will not have been spent in vain To reason for the animal world merely from analogies with human patients is liable to give rise to grave errors as indeed is also the attempt to reason that because one species of animal is a good subject for a certain anaesthetic every other kind must be It is necessary to have practical experience with each kind before opinions can be deduced and it is in order that students of the subject may have a framework for future work that so many observations and experiments are given in detail About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works A Compendium of Small Animal Surgery Robert L.
