Stearns,1987-01-01 *Civilization in the United States* Harold Stearns,2014-02 This is a reproduction of a book published before 1923 This book may have occasional imperfections such as missing or blurred pages poor pictures errant marks etc that were either part of the original artifact or were introduced by the scanning process We believe this work is culturally important and despite the imperfections have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide We appreciate your understanding of the imperfections in the preservation process and hope you enjoy this valuable book **Civilization in the United States: An Inquiry by Thirty Americans** Various Authors,1996 This book has been an adventure in intellectual co operation If it were a mere collection of haphazard essays gathered together to make the conventional symposium it would have only slight significance But it has been the deliberate and organized outgrowth of the common efforts of like minded men and women to see the problem of modern American civilization as a whole and to illuminate by careful criticism the special aspect of that civilization with which the individual is most familiar Personal contact has served to correct overemphasis and slow and careful selection of the members of a group which has now grown to some thirty odd has given to this work a unity of approach and attack which it otherwise could not possibly have had The nucleus of this group was brought together by common work common interests and more or less common assumptions As long ago as the autumn of last year Mr Van Wyck Brooks and I discussed the possibility of several of us who were engaged in much the same kind of critical examination of our civilization coming together to exchange ideas to clarify our individual fields and to discover wherein they coincided overlapped or diverged The original desire was the modest one of making it possible for us to avoid working at cross purposes I suggested that we meet at my home which a few of us did and since that time until the delivery

of this volume to the publishers we have met every fortnight Even at our first meeting we discovered our points of view to have so much in common that our desire for informal and pleasant discussions became the more serious wish to contribute a definite and tangible piece of work towards the advance of intellectual life in America We wished to speak the truth about American civilization as we saw it in order to do our share in making a real civilization possible for I think with all of us there was a common assumption that a field cannot be ploughed until it has first been cleared of rocks and that constructive criticism can hardly exist until there is something on which to construct Naturally the first problem to arise was the one of ways and means If the spirit and temper of the French encyclop dists of the 18th century appealed strongly to us certainly their method for the advancement of knowledge was inapplicable in our own century The cultural phenomena we proposed to survey were too complicated and extensive besides we wished to make a definite contribution of some kind or another while so to speak there was yet time For the cohesiveness of the group the good humoured tolerance and cheerful sacrifice of time were to some extent the consequence of the intellectual collapse that came with the hysterical post armistice days when it was easier than in normal times to get together intelligent and civilized men and women in common defence against the common enemy of reaction We wished to take advantage of this strategic situation for the furtherance of our co operative enterprise and decided finally that the simplest plan would be the best Each of us was to write a single short essay on the special topic we knew most thoroughly we were to continue our meetings in order to keep informed of the progress of our work and to see that there was no duplication we were to extend the list of subjects to whatever legitimately bore upon our cultural life and to select the authors by common agreement we were to keep in touch with each other so that the volume might have that inner consistency which could come only from direct acquaintance with what each of us was planning

Stearns, 1984-01-01 *Independent Intellectuals in the United States, 1910-1945* Steven Biel, 1995-02 A new intellectual community came together in the United States in the 1910s and 1920s a community outside the universities the professions and in general the established centers of intellectual life A generation of young intellectuals was increasingly challenging both the genteel tradition and the growing division of intellectual labor Adversarial and anti professional they exhibited a hostility to boundaries and specialization that compelled them toward an ambitious and self conscious generalism and made them a force in the American political literary and artistic landscape This book is a cultural history of this community of free lance critics and an exploration of their collective effort to construct a viable public intellectual life in America Steven Biel illustrates the diversity of the body of writings produced by these critics whose subjects ranged from literature and fine arts to politics economics history urban planning and national character Conceding that significant differences and conflicts did exist in the works of individual thinkers Biel nonetheless maintains that a broader picture of this vibrant culture has been obscured by attempts to classify intellectuals according to political or ideological persuasions His book brings to life the ways in which this community sought out alternative ways of making a living devised strategies for reaching and engaging the public debated the involvement of women in the intellectual community and incorporated Marxism into its evolving search

Consanguineous Marriages in the American Population George B. Louis Arner,2019-12-12 In *Consanguineous Marriages in the American Population* George B Louis Arner delves into the intricate sociocultural and genetic implications of consanguinity within American society Employing a meticulous blend of epidemiological research and sociological analysis Arner constructs a compelling narrative that highlights the historical contexts and contemporary realities of consanguineous unions in the U S His literary style is characterized by clarity and rigor effectively translating complex genetic concepts into accessible language while grounding his arguments in empirical data and case studies Arner a prominent figure in the fields of genetic research and public health draws from a wealth of interdisciplinary expertise that informs his examination of familial and societal attitudes towards interrelated marriages His academic journey fraught with both personal and professional encounters related to cultural diversity and hereditary health issues has shaped his perspective Through his thorough investigation Arner seeks to raise awareness about the public health implications and prevailing myths surrounding these unions contributing significantly to the discourse on genetics and marriage This book is an essential read for anyone interested in the intersections of genetics sociology and public health It not only illuminates the complexities of consanguinity in America but also invites readers to reflect on the broader implications for genetic counseling and public policy Arner s meticulously researched volume serves as a crucial resource for academics practitioners and policy makers alike The Revolt Against the Masses Fred Siegel,2015-04-07 This short book rewrites the history of modern American liberalism It shows that what we think of as liberalism the top and bottom coalition we associate with President Obama began not with Progressivism or the New Deal but rather in the wake of WWI in disillusionment with American society In the 1920s the first thinkers to call themselves liberals adopted the hostility to bourgeois life that had long characterized European intellectuals of both the left and right The aim of liberalism s founders such as Herbert Croly Randolph Bourne H G Wells Sinclair Lewis and H L Mencken was to create an American version of the aristocracy long associated with European statism Critical of mass democracy and middle class capitalism liberals despised the businessman s pursuit of profit as well as the conventional individual s pursuit of pleasure and in the 1950s liberalism expressed itself in the scornful critique of popular culture It was precisely the success of a recently elevated middle class culture that frightened the leaders of the New Class

who took up the priestly task of de democratizing America in the name of administering newly developed rights The neo Malthusianism that emerged from the 1960s did not aim to control the breeding habits of the lower classes as its eugenicist precursors had done but to mock and restrain the buying habits of the middle class Today s brand of liberalism led by Barack Obama has displaced the old Main Street private sector middle class with a new middle class composed of public sector workers allied with crony capitalists and the country s arbiters of elite style and taste
