Claimed Servants Of Fate:

Claiming Sunday Joleene Maddox Snider, 2022-11-14 An inspiring story of human souls who survived the dehumanizing system of slavery in the Old South Claiming Sunday also provides important keys to comprehending modern racial relations in a more enlightening and historically accurate manner The story is told through a richly detailed narrative revealing the lives of the enslaved on the Devereux Plantation and through interviews with their modern day descendants Julien Devereux and his elderly father John came to Texas in 1841 from Alabama Julien first settled in Montgomery County and then moved to Rusk County in 1846 When he died in 1856 he owned 10 500 acres of East Texas cotton land and seventy five enslaved Black Americans Julien s widow Sarah Landrum Devereux maintained the plantation through the Civil War The Devereux Slave Community centered on two people Tabby and Scott Together they raised eleven children and saw their family grow over the years as other lines were added to the Community The Slave Community endured the various moves from Alabama to Montgomery County Texas and then on to Rusk County but a lawsuit filed after John Devereux s death broke up Tabby and Scott s immediate family and threatened the unity of the entire Community The Devereux Slave Community s strength endurance and determination helped to repair the damage from the division of the core of the Community and carried them whole through to freedom in 1865

Claiming Indigenous Plant Knowledge Carey McCormack, 2024-11-30 Claiming Indigenous Plant Knowledge From Botanical Exchanges to Resource Extraction in the Indian Ocean World examines the collection and documentation of the natural world s development over the course of the nineteenth century into a vast network of scientists who attempted to categorize and understand nature particularly in the botanically rich Indian Ocean But the process of collecting plants and exchanging knowledge about the natural world went far beyond the labor of botanists and naturalists Naturalists depended on many groups for regional knowledge and local information about the uses names and value of plants Publications and archival materials included local and indigenous knowledge of nature but as exploration led to colonial expansion and botany became a professional science local and indigenous knowledge moved to the periphery of botanical writing Local knowledge never stopped being important but the act of discovery and the claiming perhaps even colonization of botanical knowledge became the limited sphere of professional botanists Indigenous peoples involved in the early days of collecting never stopped their activities but professionals failed to acknowledge their labor and expertise By the end of the century colonial administrations used botanic information collected by professionals to convert colonies into natural resource extraction zones This shift disrupted indigenous lifeways in the Indian Ocean World and led to environmental issues facing the region today

A Call to Stand Georgette Loschiavo,2009-10 Americans have been weathering this storm but a sequel is inevitable A nightmarish storm is hovering over Us right now and the dark clouds are threatening almost every aspect of Our lives In the wake of every crisis there comes a moment when a lightening bolt of truth hits The sting goes deep and anger arises when Our pretentious picture of Ourselves is disturbed but the pain of facing past mistakes will be worth it if it wakes Us up to remember Who We are We must learn what it takes to be good stewards of the legacy left to Us We are facing a tempestuous point in time but built into every storm is the chance to learn and grow We have to know Who We are and what is required to keep the dream alive Change must come but We must be the change The evolution of both democracy and Humankind requires education and cooperation Nothing more and nothing less The next step is a matter of choice Our choice It is time to learn from history and answer the call to take a stand
