Redefining Higher Education Melvyn L. Fein,2014-04-18 Higher education is in trouble Commentators of all stripes bemoan escalating costs and diminishing quality Solutions have been offered from all quarters but tend to be piecemeal and all too often ideological In this tough minded look at the history current climate and future of university education in the United States Melvyn L Fein reexamines the mission of higher education and outlines what institutions can do to better prepare students for an ever more complex techno commercial society Fein argues that students must have the opportunity to explore and discover what works for them and that the most important tool for institutions of higher education is self direction Professors must be allowed to teach in their own ways bringing their own experience into the classroom Since university missions differ both universities and professors need the freedom to make decisions independently The imminent need is for a democratic elite consisting of self directed leaders who possess technical and social expertise as well as personal motivation The tools for change are appropriate curricula communities of learners and a genuine marketplace of ideas While there is no magic bullet Fein contends that we can and should build on the achievements of the past so as to evolve more responsive educational institutions those that promote merit responsibility and universalism **The Wealthy, the Brilliant, the Few** Sophie Spieler,2021-06-09 How does the US make sense of its elite educational system given that it seems to be at odds with core American values such as equality of opportunity or upward mobility Sophie Spieler explores scholarly and journalistic investigations self representational texts and fictional narratives revolving around the Ivy League and its peers in order to understand elite education and its peculiar position in American cultural discourse Among the book s most surprising and groundbreaking insights is the tenacity and adaptability of meritocratic ideology across all three sub discourses despite its fundamental incompatibility with the American educational system *The Road Story and the Rebel* , This cultural history reveals the unique qualities of road stories and follows the evolution from the Beats postwar literary adventures to today s postmodern reality television shows Tracing the road story as it moves to both LeRoi Jones s critique of

the Beats romanticization of blacks as well as to the mainstream in the 1960s with CBS's *Route 66* Mills also documents the rebel subcultures of novelist Ken Kesey and the Merry Pranksters who used film and LSD as inspiration on a cross country bus trip and she examines the sexualization of male mobility and biker mythology in the films *Scorpio Rising* *The Wild Angels* and *Easy Rider* Mills addresses how the filmmakers of the 1970s Coppola Scorsese and Bogdanovich flourished in New Hollywood with road films that reflected mainstream audiences and how feminists Joan Didion and Betty Friedan subsequently critiqued them A new generation of women and minority storytellers gain clout and bring genre remapping to the national consciousness Mills explains as the road story evolves from such novels as *Song of Solomon* to films like *Thelma and Louise* and television's *Road Rules* 2

Post-Liberalism Melvyn L. Fein, 2017-09-08 Liberalism is dying despite its superficial appearance of vigor Most of its adherents still believe it is the wave of the future but they are clinging to a sinking dream So says Melvyn L Fein who argues that liberalism has made countless promises almost none of which have come true Under its auspices poverty was not eliminated crime did not diminish the family was not strengthened education was not improved nor was universal peace established These failures were not accidental they flow directly from liberal contradictions In *Post Liberalism* Fein demonstrates why this is the case Fein contends that an inverse force rule dictates that small communities are united by strong forces such as personal relationships and face to face hierarchies while

large scale societies are integrated by weak forces such as technology and social roles As we become a more complex techno commercial society the weak forces become more dominant This necessitates greater decentralization in direct opposition to the centralization that liberals celebrate Paradoxically this suggests that liberalism as an ideology is regressive rather than progressive If so it must fail Liberals assume that some day under their tutelage these trends will be reversed but this contradicts human nature and history s lessons According to Fein we as a species are incapable of eliminating hierarchy or of loving all other humans with equal intensity Neither as per Emile Durkheim are we able to live in harmony without appropriate forms of social cohesion

her dual citizenship in the working class and middle class and the life stories of students clients and relatives Jensen brings into focus the clash between the realities of working class life and middle class expectations for working class people Focusing on education she finds that at every point in their personal development and educational history working class children are misunderstood ignored or disrespected by middle class teachers and administrators Education while often hailed as a way to cross classes brings with it its own set of conflicts and internal struggles These problems can lead to a divided self resulting in alienation and suffering for the upwardly mobile student Jensen suggests how to increase awareness of the value of working class cultures to a truly inclusive American society at personal professional and societal levels
