Forward with Classics Arlene Holmes-Henderson, Steven Hunt, Mai Musié, 2018-08-09 Despite their removal from England's National Curriculum in 1988 and claims of elitism Latin and Greek are increasingly re entering the mainstream educational arena Since 2012 there have been more students in state maintained schools in England studying classical subjects than in independent schools and the number of schools offering Classics continues to rise in the

state maintained sector The teaching and learning of Latin and Greek is not however confined to the classroom community based learning for adults and children is facilitated in newly established regional Classics hubs in evenings and at weekends in universities as part of outreach and even in parks and in prisons This book investigates the motivations of teachers and learners behind the rise of Classics in the classroom and in communities and explores ways in which knowledge of classical languages is considered valuable for diverse learners in the 21st century The role of classical languages within the English educational policy landscape is examined as new possibilities exist for introducing Latin and Greek into school curricula The state of Classics education internationally is also investigated with case studies presenting the status quo in policy and practice from Australasia North America the rest of Europe and worldwide The priorities for the future of Classics education in these diverse locations are compared and contrasted by the editors who conjecture what strategies are conducive to success

Companion to Shakespeare and Classical Literature Sean Keilen,Nick Moschovakis,2017-03-31 In this wide ranging and ambitiously conceived Research Companion contributors explore Shakespeare's relationship to the classic in two broad senses The essays analyze Shakespeare's specific debts to classical works and weigh his classicism's likeness and unlikeness to that of others in his time they also evaluate the effects of that classical influence to assess the extent to which it is connected with whatever qualities still make Shakespeare himself a classic arguably the classic of modern world literature and drama The first sense of the classic which the volume addresses is the classical culture of Latin and Greek reading translation and imitation Education in the canon of pagan classics bound Shakespeare together with other writers in what was the dominant tradition of English and European poetry and drama up through the nineteenth and even well into the twentieth century Second and no less central is the idea of classics as such that of books whose perceived value exceeding that of most in their era justifies their protection against historical and cultural change The volume's organizing insight is that as Shakespeare was made a classic in this second antiquarian sense his work's reception has more and more come to resemble that of classics in the first sense of ancient texts subject to labored critical study by masses of professional interpreters who are needed to mediate their meaning simply because of the texts growing remoteness from ordinary life language and consciousness The volume presents overviews and argumentative essays about the presence of Latin and Greek literature in Shakespeare's writing They coexist in the volume with thought pieces on the uses of the classical as a historical and pedagogical category and with practical essays on the place of ancient classics in today's Shakespearean classrooms

General Ecology Erich Hörl,James Edward Burton,2017-05-04 Ecology has become one of the most urgent and lively fields in both the humanities and sciences In a dramatic widening of scope beyond its original concern with the coexistence of living organisms within a natural environment it is now recognized that there are ecologies of mind information sensation perception power participation media behavior belonging values the social the political a thousand ecologies This proliferation is not simply a metaphorical extension of the figurative potential of natural ecology rather it reflects the thoroughgoing imbrication of natural and technological elements in the constitution of the contemporary environments we inhabit the rise of a cybernetic natural state with its corresponding mode of power Hence this ecology of ecologies initiates

and demands that we go beyond the specificity of any particular ecology a general thinking of ecology which may also constitute an ecological transformation of thought itself is required In this ambitious and radical new volume of writings some of the most exciting contemporary thinkers in the field take on the task of revealing and theorizing the extent of the ecologization of existence as the effect of our contemporary sociotechnological condition together they bring out the complexity and urgency of the challenge of ecological thought one we cannot avoid if we want to ask and indeed have a chance of affecting what forms of life agency modes of existence human or otherwise will participate and how in this planet's future
