The West and the Rest Roger Scruton, 2014-05-13

Scruton shows how the different religious and philosophical roots of Western and Islamic societies have resulted in those societies profoundly divergent beliefs about the nature of political order For one thing the idea of the social contract crucial to the self conception of Western nations is entirely absent in Islamic societies Similarly Scruton explains why the notions of territorial jurisdiction citizenship and the independent legitimacy of secular authority and law are both specifically Western and fundamentally antipathetic to Islamic thought And yet says Scruton for its adherents Islam provides amply for one of the most fundamental of human needs the need for membership In contrast the decay of the West's own political vision and its concomitant preoccupation with individual choice has finally led to a culture of repudiation in which that need goes increasingly unfulfilled principally because the sources of its fulfillment patriotism religious belief traditional ways of life are routinely mocked Globalization has made these facts an explosive mixture Migration modern communications and the media have inexorably brought the formerly remote inhabitants of Islamic nations into constant contact with the images products and peoples of secular liberal democracies Scruton warns that in light of this new reality certain Western assumptions about consumption and prosperity about borders and travel about free trade and multinational corporations and about multiculturalism need to be thoroughly re evaluated The West and the Rest is a major contribution to the West's public discourse about terrorism civil society and liberal democracy

What the Rest Think of the West Laura Nader, 2015-09-08

Over the past few centuries as Western civilization has enjoyed an expansive and flexible geographic domain Westerners have observed other cultures with little interest in a return gaze In turn these other civilizations have been similarly disinclined when they have held sway Clearly though an external frame of reference outstrips introspection we cannot see ourselves as others see us Unprecedented in its scope What the Rest Think of the West provides a rich historical look through the eyes of outsiders as they survey and scrutinize the politics science technology religion family practices and gender roles of civilizations not their own The book emphasizes the broader figurative meaning of looking west in the scope of history Focusing on four civilizations Islamic Japanese Chinese and South Asian Nader has collected observations made over centuries by scholars diplomats missionaries travelers merchants and students reflecting upon their own Wests These writings derive from a range of purposes and perspectives such as the seventh century Chinese Buddhist who goes west to India the missionary from Baghdad who travels up the Volga in the tenth century and meets the Vikings and the Egyptian imam who in 1826 is sent to Paris to study the French The accounts variously express critique adoration admiration and fear and are sometimes humorous occasionally disturbing at times controversial and always enlightening With informative introductions to each of the selections Laura Nader initiates conversations about the power of representational practices

Globalization and the Third World B. Ghosh, H. Guven, 2006-05-26 The impact of globalization on the world's developing economies is not conclusive studies show conflicting conclusions to the same problems in the context of globalization in developing countries It is this analytical inconclusiveness that is at the heart of this collection which makes a fresh attempt to study the real impact of globalization

Western Empires, Christianity and the Inequalities between the West and the Rest Samia Terreblanche, 2014-09-30 The acute problem of inequality in the world was brought centre stage by the sensational appearance of French economist Thomas Piketty's bestselling book *Capital in the Twenty first Century* In *Western Empires*

Christianity and the Inequalities between the West and the Rest 1500 2010 Sampie Terreblanche studies the matter from a political economic perspective and brings five centuries of global history to bear in his focus on global as opposed to internal national inequalities The unprecedented accumulation of wealth in the Western world has come at a dire cost to the Restern world a term the author coins and empire building is at the root of it The last 500 years have seen successive epochs of empire followed by war and systemic chaos During this time the haves of world history have systematically channeled global resources towards the West through cunning and conquest a process in which Christian missionary societies played a key role as the soft avant garde followed by the hardware The book deals with several concepts of empire and the forces through which empires have been rolled out through history arms money ideology religion What fed into the Eurocentrism and notion of superiority which paved the way for a lamentable history of slavery exploitation and the unremitting accumulation of wealth and power The book shows how clearly dangerous a world we live in with the scales as precipitously tipped as they are Ten years in the writing and in many ways the apex of this decorated author s life work Western Empires is a book for everyone who wishes to understand or address the extreme concentration of wealth in the hands of the global few and the hopeless poverty of the many
