

## **PM - PLANNED MAINTENANCE PROGRAM**

A planned maintenance program of regular, routine inspections and lubrication is important for long life and trouble-free operation of your lift truck. Make and keep records of your inspections. Use these records to help establish the correct PM intervals for your application and to indicate maintenance required to prevent major problems from occurring during operation.

The periodic maintenance procedures outlined in this manual are intended to be used with the PM report form. They are arranged in groupings of maintenance work that are done in a logical and efficient sequence.

A check mark or entry is made on the PM Report Form when the PM is performed. Please note the special coding system for indicating the importance of needed repairs and/or adjustments.

When you have finished the PM inspections, be sure to give a copy of the report to the designated authority or the person responsible for lift truck maintenance.

**Do not make repairs or adjustments unless authorized to do so.**

**For safety, it is good practice to:**

Remove all jewelry (watch, rings, bracelets, etc.) before working on the truck.

Always wear safety glasses when making repairs.

**Be sure to:**

Make a record of all maintenance and operating problems you find.

Write the hour meter reading on the PM report form.

### **HOW TO PERFORM THE PM PERIODIC INSPECTIONS AND MAINTENANCE**

#### **Visual Inspection**

First, perform a visual inspection of the lift truck and its components. Walk around the truck and take note of any obvious damage and maintenance problems. Check for loose fasteners and fillings.

#### **NAMEPLATES AND DECALS**

Check to be sure all capacity, safety, and warning plates or decals are attached and legible.

Do not operate or allow a lift truck with damaged or missing decals and name plates to be operated. They contain important information. Replace them immediately.

Be sure that safety devices are in place, undamaged, and attached securely.

#### **Wheels and Tires**

Check the condition of the drive wheel and tire and the load wheels. Remove objects that are embedded in the tread. Inspect the tires for excessive wear and breaks or "chunking out", and bond failure between the tire and rim.

Check all wheels for proper tightness. Adjust if necessary.
