Anderson, Christopher R. Hardy, Jeffrey Leeson, 2010-03-18 Leading a Learning Revolution tells the compelling story of a learning revolution that took place within the U S Department of Defense Written by practitioners who actually walked the walk this account of the creation of Defense Acquisition University DAU provides a clear blueprint that others can follow It shares in detail the best practices they developed so that the thousands of training organizations worldwide striving to create premier corporate universities can catapult forward Offering an insider s look at the process the authors clearly explain how

they transformed an outdated training provider into a world class university Step by step the book outlines the enduring principles that were pivotal to Defense Acquisition University s success and describes the environment early victories current methods and subsequent results The authors discuss how to establish a mission and vision develop a performance based strategic planning process and tackle change initiative They also explain the development and implementation of web enabled learning architecture and reveal how to effectively measure and evaluate performance In addition the authors present strategies for assuring continual improvement and organizational growth With this book any organization can tap into DAU s best practices and winning strategies for improving corporate learning **Becoming a More Versatile**

**Learner** Center for Creative Leadership (CCL),Maxine A. Dalton,2011-07-26 Almost all managers regard job experiences and the lessons they provide essential for their development as leaders But not all of those managers are successful at learning those lessons That difficulty is often related to a manager s relying too much on one preferred learning tactic a tactic that might not be suited for gleaning the lessons of a particular job experience By increasing the number of learning tactics and becoming a more versatile learner managers can better position themselves to take advantage of the lessons that job experiences offer and contribute to their leadership development *Authentic Professional Learning* Ann

Webster-Wright,2010-08-05 There is considerable and growing interest in professionals learning across their working lives The growth in this interest is likely premised upon the increasing percentage of those who are being employed under the designation as professi als or para professional workers in advanced industrial economies Part of being designated in this way is a requirement to be able to work autonomously and in a relatively self regulated manner Of course many other kinds of employment also demand such behaviours However there is particular attention being given to the ongoing development of workers who are seen to make crucial decisions and take actions about health legal and nancial matters Part of this attention derives from expectations within the community that those who are granted relative autonomy and are often paid handsomely should be current and informed in their decisi making Then like all other workers professionals are required to maintain their competence in the face of changing requirements for work Consequently a volume that seeks to inform how best this ongoing learning can be understood supported and assisted is most timely and welcomed This volume seeks to elaborate professional learning through a consideration of the concept of authentic professional learning What is proposed here is that in contrast to programmatic approaches towards professional development the process of continuing professional learning is a personal complex and diverse process that does not lend itself to easy prescription or the realisation of others intents Achieving Adaptability Through Inquiry Based Learning Thomas M. Duffy,2010 *The Bases of Competence* Frederick T. Evers,James C. Rush,Iris Berdrow,1998-10-02 The Bases of Competence explains what skills and competencies students need to succeed in today s workplace and details how colleges and universities can strengthen the curriculum to cultivate these skills in their undergraduate students The book addresses the continuing disparity between the skills

developed in college and the essential skills needed in the dynamic workplace environment By providing a common language from which to work The Bases of Competence enables both educators and employers to create educational experiences of practical and enduring value Drawing on more than a decade of research on companies graduates and students the authors identify four distinct skill combinations most desired by employers Managing Self Communicating Managing People and Tasks and Mobilizing Innovation and Change Using case studies and best practices from a wide variety of institutional settings and workplace environments the authors show how developing competencies narrows the gap between the classroom and work providing students with a portfolio of basic skills that translate into lifelong employability

Foundations for Learning with Student Access Code Laurie L. Hazard, Jean-Paul Nadeau, 2012-08-12 This book is appropriate for courses in First Year Experience College Success and Study Skills The focus of Foundations for Learning is on academic adjustment with personal development issues seamlessly integrated into the academic emphasis theme of claiming an education and taking responsibility for one's own education Foundations for Learning addresses both the attitudinal variables and personality traits that affect college achievement like locus of control conceptions of intelligence and intellectual curiosity in relation to specific study related behaviors such as text annotation and active listening At its core this text is based on the psychology of adjustment Students are pushed to consider how each mindset perception and attitude connects with their skill sets and how one influences the other The text encourages students to use this insight to make the necessary adjustments to their new role as college students It offers an acute awareness of first year student needs an intellectual approach and a tight framework It is primarily focused on the development of academic adjustment issues and meta cognitive strategies as they naturally unfold during the first semester as opposed to primarily focusing on social adjustment issues or issues that aren't immediately relevant such as career development and is written in a challenging yet accessible way This revision covers emerging technologies broadens its audience and more
