Resources in Education ,1994 The College Board College Handbook College Board,2008 This comprehensive guide contains objective information on every accredited college in the U S 2 150 four year colleges and universities and 1 650 two year and community colleges A planning calendar and worksheets help students organize their applications **Redesigning America's Community Colleges** Thomas R. Bailey,Shanna Smith Jaggars,Davis Jenkins,2015-04-09 In the United States 1 200 community colleges enroll over ten million students each year nearly half of the nation s undergraduates Yet fewer than 40 percent of entrants complete an undergraduate degree within six years This fact has put pressure on community colleges to improve academic outcomes for their students Redesigning America s Community Colleges is a concise evidence based guide for educational leaders whose institutions typically receive short shrift in academic and policy discussions It makes a compelling case that two year colleges can substantially increase their rates of student success if they are willing to rethink the ways in which they organize programs of study support services and instruction Community colleges were originally designed to expand college enrollments at low cost not to maximize completion of high quality programs of study The result was a cafeteria style model in which students pick courses from a bewildering array of choices with little guidance The authors urge administrators and faculty to reject this traditional model in favor of guided pathways clearer more educationally coherent programs of study that simplify students choices without limiting their options and that enable them to complete credentials and advance to further education and the labor market more quickly and at less cost Distilling a wealth of data amassed from the Community College Research Center Teachers College Columbia University Redesigning America s Community Colleges offers a fundamental redesign of the way two year colleges operate stressing the integration of services and instruction into more clearly structured programs of study that support every student s goals
