Challenging Racism Sexism Alternatives To Genetic Explanations Genes Gender Vii:

Genes and the Bioimaginary Deborah Lynn Steinberg, 2016-03-03 *Genes and the Bioimaginary* examines the dramatic rise and contemporary cultural apotheosis of the gene. The book traces not only the genetification of modern life but is also a journey through the complex relationship between science and culture. At the heart of this book are three interlinked questions. The first concerns the paradigmatic transformations of the genetics revolution: how can we understand the impact of genes on social arenas as diverse as law and agriculture, politics and medicine, genealogy and jurisprudence? Second, how has the language of genes come to pervade public discourse as much a trope of personal narrative as of the popular imaginary? And third, how can we gain critical purchase not only on the conditions and consequences of a particular science but on its projective seductions, the terms of its persuasion and the dilemmas and anxieties provoked in its wake? Through a series of illuminating case studies ranging from gay genes to Jew genes to genes for crime from CSI to the Innocence Project from genetics post racial imaginary to its phantasies of redemption, the book examines the emergence of the gene as a pre eminent locus of both scientific and social explanation and as a powerful object of spectacle, projective phantasy and attachment. *Genes and the Bioimaginary* makes a distinctive contribution to our understanding of how knowledge comes to be not only powerful but plausible.

The Gender and Psychology Reader Blythe Clinchy, Julie K Norem, 1998-04 Touches upon most of the significant and controversial underlying issues involved in the study of gender including methodological issues. The selections included range from research summaries on particular topics e.g. gender differences in emotion to work on development of gendered self concepts to discussion of psychology's ambivalence about the study of difference and its failure to systematically consider race, ethnicity and class. The concluding chapter considers unifying themes, gaps in current perspectives and future directions. Annotation copyrighted by Book News Inc. Portland, OR.

Changing Lives, 1995 A A A Thirteen women's studies pioneers from eleven Asian countries narrate their individual passages into feminist consciousness and the monumental effect of women's studies on their private and professional lives. Each woman's odyssey moves against the backdrop of her country's social and political systems as well as through the dailiness of her family life. In their efforts to balance demanding careers as anthropologists, economists, psychologists and even as a member of parliament with normal family lives, these women all come to realize that their husbands experienced no such difficulties. They regard women's studies as a key strategy for changing women's lives just as it has changed theirs. A A A In *Changing Lives* women's studies link these stories although the individual narratives are extremely diverse. Aurora Javate de Dios worked as a political activist in the Philippines in the 1970s, then married and reared three children before becoming a women's studies pionerr. Economist Fareeha Zafar worked to establish the first women's trade union in Pakistan in the early 1970s and to found the Women's Action Forum and women's studies in Pakistan. After Liang Jun of China at 40 married with two children and an academic career, attended a lecture by Li Xiaojiang, she suddenly saw a lighthouse on a dark sea. women as they negotiate a society that is hostile to them on multiple levels how ethnicity class gender sexual orientation and other differences come into play within the therapeutic dyad and approaches to unraveling the complex interplay of sociopolitical intrapsychic and interpersonal concerns in treatment Filled with illustrative clinical material and pointers for practice the volume will enhance the cultural competence of mental health practitioners and students across a range of disciplines

Handbook of Gender Research in Psychology Joan C. Chrisler, Donald R. McCreary, 2010-03-12 Donald R. McCreary and Joan C. Chrisler The Development of Gender Studies in Psychology Studies of sex differences are as old as the field of psychology and they have been conducted in every subfield of the discipline There are probably many reasons for the popularity of these studies but three reasons seem to be most prominent First social psychological studies of person perception show that sex is especially salient in social groups It is the first thing people notice about others and it is one of the things we remember best Fiske, Haslam, Stangor, Lynch, Duan, Glass 1992 For example people may not remember who uttered a witty remark but they are likely to remember whether the quip came from a woman or a man Second many people hold firm beliefs that aspects of physiology suit men and women for particular social roles Men's greater upper body strength makes them better candidates for manual labor and their greater height gives the impression that they would make good leaders in people we look up to Women's reproductive capacity and the caretaking tasks e.g. breastfeeding, baby minding that accompany it make them seem suitable for other roles that require gentleness and nurturance Third the logic that underlies hypothesis testing in the sciences is focused on difference Researchers design their studies with the hope that they can reject the null hypothesis that experimental groups do not differ

The Mirage of a Space between Nature and Nurture Evelyn Fox Keller, 2010-06-11 The esteemed historian and philosopher of science Evelyn Fox Keller addresses the nature/nurture debate arguing that it is riddled by conceptual incoherence
