## **Challenging Violence In Schools An Issue Of Masculinities:**

*Challenging Violence in Schools* Martin Mills, 2001 While violence by boys towards girls is readily recognized as being gender based Mills education U of Queensland Australia argues that all violence of boys in schools is gender based for example contending that the common notion of bullying is an example of boundary policing usually with a homophobic edge which serves to normalize particular constructions of masculinity while also determining where a boy is positioned within a hierarchical arrangement of masculinities Drawing on insights of feminist scholarship he attempts to analyze the possible development of strategies and programs that seek to challenge the existence of gender based violence in schools After discussing the theoretical underpinnings of such work he moves to an exploration of the curriculum and pedagogy issues in relation to challenging dominant notions of masculinity that lead to violence Annotation copyrighted by Book News Inc Portland OR

*Challenging Violence in Schools* Martin Mills, 2001 This book explores the relationship between violence and masculinity within schools There is a clear need to explore this relationship A substantial amount of evidence exists which demonstrates how boys are the major perpetrators of violence in schools from extreme acts of violence such as school shootings in the US to more common forms of schoolyard bullying and that both girls and boys are their victims The book suggests that violence has been masculinized in such a way that boys often perpetrate violence as a means of demonstrating their perception of what counts as a valued form of masculinity This masculinization of violence has often meant that girls experience violence from boys who are seeking to demonstrate their superiority over girls and it has also meant that some boys often experience violence due to their non conformity to dominant images of masculinity In order to support these arguments the book draws on extensive interview data collected from boys and teachers who were involved in anti violence programmes in their schools

Across media academy and popular culture in western societies there is much talk of an implosion of the modern gender order Education is often presented as a key site in which a crisis of masculinity is played out and schools have become a focus for practical attempts to reconcile social and cultural transformations through the recalibration of teaching and learning increasing male teachers and masculinising the content of subjects Education and Masculinities argues that we are experiencing a shift from the establishment of the social constitution of gender associated with modernity politics to the gendering of society that has an intensified resonance among men and women in a global based late modernity The book explores the main social and cultural approaches to education and masculinities within the broader context of sex and gender relations considering the masculinity question alongside local and global changes in society and bringing a fresh evaluation of key issues Included in the book how the suggestion of academically successful girls and failing boys plays out in relation to issues of inequality across class and ethnicity a current empirical analyses of gender inequality across schools higher education and the labour market representation identity and cultural difference with reference to male and female social experiences and cultural meanings forms of power connected to social divisions and cultural differences Education and Masculinities provides a critical yet constructive diagnosis of gender relations across educational sites exploring both academic accounts and alternative global responses that illustrate the limits of Western models and sensibilities This accessible book will be valuable reading for students following courses in education sociology gender studies and other social sciences and humanities courses      **School Bullying and Marginalisation** Rosalyn H. Shute, Phillip T. Slee, 2022-01-12

This book addresses and seeks to harmonise different paradigms for understanding school bullying It sets out to examine two paradigms for conceptualising bullying and the worldviews that underpin them It uses a complex systems perspective to bring the two paradigms together in a holistic fashion By doing so it creates an integrated framework for conceptualising the many individual relational and societal factors that are in dynamic interaction and play a part in promoting or reducing school bullying This book draws upon a number of disciplines by way of background including evolutionary child development and social psychological theories of group behaviour and identity It proposes that the human need for belonging

is central to understanding bullying and situates the topic within an understanding of gender and children's human rights bringing philosophical and moral perspectives to bear. It discusses practical ways forward, presents a systemic approach to bullying and application of complex adaptive systems methods to bullying research and evaluation. It serves as an introduction to such methods and suggests further creative ideas for policy intervention practice and teacher education about bullying.

**The Problem with Boys' Education** Wayne Martino, Michael D. Kehler, Marcus B.

Weaver-Hightower, 2009-08-03 This book offers an illuminating analysis of the theories, politics and realities of boys' education around the world, an insightful and often disturbing account of various educational systems' successes and failings in fostering intellectual and social growth in male students. Examining original research on the impact of implementing boys' education programs in schools, the book also discusses the role of male teachers in educating boys, strategies for aiding marginalized boys in the classroom and the possibilities for gender reform in schools that begins at the level of pedagogy. Complete with case studies of various classrooms, school districts and governmental policy programs, the detailed essays collected provide a look into education's role in the development of masculinities, paying special attention to the ways in which these masculinities intersect with race, class and sexuality to complicate the experience of boys within and outside of a classroom setting.

**Social Class, Gender and Exclusion from School** Jean Kane, 2013-10-14

Rising exclusion rates indicate the continuing marginalisation of many young people in education in the UK. Working class boys, children living in poverty and children with additional special educational needs are among those experiencing a disproportionate rate of exclusion. This book traces the processes of exclusion and alienation from school and relates this to a changing social and economic context. Jean Kane argues that policy on schooling, including curricular reform, needs to be reconnected to the broad political pursuit of social justice and presents compelling case studies of excluded pupils showing the multi-faceted identities of pupils with a particular focus on masculine and feminine identities. This invaluable contribution to the literature offers an alternative analysis where the social identities of pupils are shown to be tied up with their exclusion from school. Themes investigated include the meanings of school exclusions, social class, gender and schooling, social identities of excluded pupils, negotiating identities in school, moving towards exclusion, exclusions and young people's lives, improving participation in schooling. Providing fascinating reading for teachers, social workers, researchers and policy makers, this book considers how educational disadvantage might be addressed through recognition of the gender and class identities of pupils.
