enhances the real world tasks of institutional research and policy planning *Journal of Higher Education* A significant contribution to the literature documenting American institutions of the late nineteenth century This cohesive work explores the notion of changing community by focusing on a dramatic episode in Dartmouth's history While the roots of the controversy may be explained in part by the college's unique legacy Tobias carefully demonstrates how this model of community conflict is a reflection of the transformation taking place within the larger society will interest not only community historians but also educators and policy analysts This fine piece of historical analysis may well serve as a model for similar studies in the histories of community and education *Public Historian* An important addition to a small but growing list of monographs and scholarly articles that are revising our understanding of American colleges in the nineteenth century Eschewing traditional institutional history Marilyn Tobias has developed a more imaginative interpretive framework Through comparison and contrast of the public attitudes group roles and self conception of faculty students alumni and trustees of both eras Tobias demonstrates that Dartmouth underwent fundamental changes in institutional characteristics and educational mission In significant ways Tobias has broken methodologically with traditional college historians She has provided us with a number of new insights concerning the nineteenth century American college and she has furthered the efforts of certain contemporary historians to place the history of these colleges fully within the context of national cultural and institutional developments *Journal of American History* Brings educational history into the mainstream of current American historiography and removes Dartmouth from isolation By using a community studies approach and incorporating recent findings concerning the professions urban life and the antebellum colleges the author attempts to explain institutional change through factors outside of the college to connect higher education to the broader society and to establish an agenda and at minimum a vocabulary for the study of other educational institutions during the age of modernization The interpretation of the crisis at Dartmouth is attractive and useful Especially important for researchers is the incorporation of the role of trustees students and the scientific technological faculty *History of Education Quarterly*

Conference, 1920 Changing Conceptions, Changing Practices Angela Glotfelter, Caitlin Martin, Mandy Olejnik, Ann Updike, Elizabeth Wardle, 2022-12-28 *Changing Conceptions Changing Practices* demonstrates that it is possible for groups of faculty members to change teaching and learning in radical ways across their programs despite the current emphasis on efficiency and accountability Relating the experiences of faculty from disciplines as diverse as art history economics psychology and philosophy this book offers a theory and research based heuristic for helping faculty transform their courses and programs as well as practical examples of the heuristic in action The authors draw on the threshold concepts framework research in writing studies and theories of learning leadership and change to deftly explore why faculty are often stymied in their efforts to design meaningful curricula for deep learning and how carefully scaffolded professional

development for faculty teams can help make such change possible This book is a powerful demonstration of how faculty members can be empowered when professional development leaders draw on a range of scholarship that is not typically connected In today s climate courses programs and institutions are often assessed by and rewarded for proxy metrics that have little to do with learning with grave consequences for students The stakes have never been higher particularly for public higher education Faculty members need opportunities to work together using their own expertise and to enact meaningful learning opportunities for students Professional developers have an important role to play in such change efforts WAC scholars and practitioners leaders of professional development and centers for teaching excellence program administrators and curriculum committees from all disciplines and faculty innovators from many fields will find not only hope but also a blueprint for action in Changing Conceptions Changing Practices Contributors Juan Carlos Albarr n Jos Amador Annie Dell Aria Kate de Medeiros Keith Fennen Jordan A Fenton Carrie E Hall Elena Jackson Albarr n Erik N Jensen Vrinda Kalia Janice Kinghorn Jennifer Kinney Sheri Leafgren Elaine Maimon Elaine Miller Gaile Pohlhaus Jr Jennifer J Quinn Barbara J Rose Scott Sander Brian D Schultz Ling Shao L James Smart Pepper Stetler
