A World of Robots

For many years, people have told stories about robots that can do the jobs of humans. These machines can help us live better and can see such robots in movies.

The first movie robot was shown in a film made in 1924. In the movie, the robot was made to free humans from **mundane** tasks. Sometimes, these friends, Is a world of robots just a dream?

They are now a part of real life. However, robots have only been around for about 100 years. Before robots could be made, scientists had to invent a type of "brain" for them. That happened when people created computer chips. Many robots also have sensors inside them. The **sensors** help robots "see" light and "feel" walls or things in their paths. Sensors also help by recognizing **commands** given to robots by people. Commands tell a robot to move in one way or another. By moving in these ways, a robot can do a specific job. What kinds of jobs do people give to robots?

Like the robots in the 1924 movie, robots today can do repetitive tasks without getting **tired**. They paint things, make car parts, place food in boxes, and even build super chips too!

Robots are programmed to do jobs that are dangerous for people. Robots can take jobs that are too hot or too cold for humans. Robots can crawl into pipes to see if something is blocking the flow of water. Robots can even go into a volcano to collect rock samples.

Robots can also go to deep underwater places and very cold places. For example, what if a robot that works on the planet Mars. What would it be like in the future?

Robots can learn how to handle different objects around them. They know how to handle a glass, but an egg can break easily. They will learn to handle things with people. They will recognize human emotions like happiness, sadness, and anger. With robots like these, our lives will be very different. Science fiction movies of the past.

Robots can see light and sound.
