Nanotechnology - The Invisible World Tarryn Lee Botha ,Muthumuni Managa,Edward Nxumalo,2025-04-09 This Collection will focus on all aspects of nanotechnology Did you for example know that the nanoscale ranges between 1 100 nm which is a million times smaller than an average ant In this Collection we will provide a brief history of nanotechnology including what it is and what nanomaterials look like Articles will illustrate ways that nanotechnology can be used to improve human lives When manufacturing nanomaterials we can change many of their propertiesalso known as their characteristics Nanomaterials can exist in various shapes such as spheres rods stars or even tubes By changing the shape composition or size of a nanomaterial we can change its functions One famous example the buckyball is a carbon based nanomaterial that looks like a cage it can be used as a lubricant or medicines can be loaded within it Whenever we choose to use nanomaterials we must first ensure that they are safe for all living things and the environment The development of nanotechnology holds great promise for future technological developments As a fast developing field the products of nanotechnology can be found in all aspects of our lives including food cosmetics electronics and paint In this Collection we will explain how nanotechnology can be used to remove pollutants from our water or to develop energy storage systems describe how biosensors work and discuss the challenges faced in ensuring the safe use of nanomaterials

**Invisible** Philip Ball,2015-04-08 A very fun largely chronological journey through invisibility beginning with myth and early magicians ending with quantum physics The New Yorker In this lively look at a timeless idea Ball provides the first comprehensive history of our fascination with the unseen This sweeping narrative moves from medieval spell books to the latest nanotechnology from fairy tales to telecommunications from camouflage to ghosts to the dawn of nuclear physics and the discovery of dark energy Along the way Invisible tells little known stories about medieval priests who blamed their misdeeds on spirits the Cock Lane ghost which intrigued both Samuel Johnson and Charles Dickens the attempts by Victorian scientist William Crookes to detect forces using tiny windmills novelist Edward Bulwer Lytton s belief that he was unseen when in his dressing gown and military efforts to enlist magicians to hide tanks and ships during WWII Bringing in such voices as Plato and Shakespeare Ball provides not only a scientific history but a cultural one showing how our simultaneous desire for and suspicion of the invisible has fueled invention and the imagination for centuries In this unusual and clever book Ball shows that our fantasies about being unseen and seeing the unseen reveal surprising truths about who we are Full of insights drawn from a broad survey of history literature and philosophy wherever the invisible is being contemplated Ball is there to select the juiciest anecdotes He is a lucid witty and highly entertaining guide The Globe and Mail A tour de force history capped off with an animated discussion of H G Wells s novel The Invisible Man Publishers Weekly starred review

Imagining Solar Energy Gregory Lynall,2020-02-20 Shortlisted for the 2022 ESSE Book Awards How has humanity sought to harness the power of the Sun and what roles have literature art and other cultural forms played in imagining mythologizing and reflecting the

possibilities of solar energy What stories have been told about solar technologies and how have these narratives shaped developments in science and culture What can solar power's history tell us about its future within a world adapting to climate crisis Identifying the history of capturing solar radiance as a focal point between science and the imagination Imagining Solar Energy argues that the literary artistic and mythical resonances of solar power from the Renaissance to the present day have not only been inspired by but have also cultivated and sustained its scientific and technological development Ranging from Archimedes to Isaac Asimov John Dee to Humphry Davy Aphra Behn to J G Ballard the book argues that solar energy translates into many different kinds of power physical political intellectual and cultural and establishes for the first time the importance of solar energy to many literary and scientific endeavours

**Unbelievable** Graham Ward, 2014-09-30 Why believe What kinds of things do people believe in How have they come to believe them And how does what they believe or disbelieve shape their lives and the meaning the world has for them For Graham Ward who is one of the most innovative writers on contemporary religion these questions are more than just academic They go to the heart not only of who but of what we are as human beings Over the last thirty years our understandings of mind and consciousness have changed in important ways through exciting new developments in neuroscience The author addresses this quantum shift by exploring the biology of believing He offers sustained reflection on perception cognition time emotional intelligence knowledge and sensation Though the truth of belief remains under increasing attack in a thoroughly secularised context Ward boldly argues that secularity is itself a form of believing Pointing to the places where prayer and dreams intersect this book offers a remarkable journey through philosophy theology and culture thereby revealing the true nature of the human condition

**The Indescribable God** Barry D. Smith, 2012-10-05 The God of classical Christian faith is radically transcendent utterly beyond understanding and words So if God is to be known it must be in the luminous darkness of unknowing Drawing on a wide range of primary sources biblical patristic and medieval Barry D Smith identifies and explores seven ways of expressing the otherness of God in classical Christian thinking By allowing historical theologians to speak for themselves he shows how an aversion to ontotheology long precedes postmodernism The book first lays out the Old Testament and New Testament foundations for subsequent Christian reflections on divine transcendence These were the teachings that the early church assumed and with the assistance of Greek philosophy further refined with their own set of apophatic conceptual tools The main focus of the book is a sevenfold exposition of that theological refinement Smith concludes by looking towards possible future theological developments within this apophatic tradition Drawing on the theological methodology of historic Christianity he indicates how a synthesis of the biblical teaching on the otherness of God with philosophical traditions other

**Chameleo** Robert Guffey, 2015-04-23 A mesmerizing mix of Charles Bukowski Hunter S Thompson and Philip K Dick Chameleo is a true account of what happened in a seedy Southern California town when an enthusiastic and unrepentant heroin addict named Dion Fuller sheltered a U S Marine who'd stolen night vision goggles and perhaps a few top secret files from a nearby military base Dion found himself arrested under the ostensible auspices of The Patriot Act for conspiring with international terrorists to smuggle Top Secret military equipment out of Camp Pendleton The fact that Dion had absolutely nothing to do with international terrorists smuggling Top Secret military equipment or Camp Pendleton didn't seem to bother the military He was released from jail after a six day long Abu Ghraib style interrogation Subsequently he believed himself under intense government scrutiny and he suspected the subject of bizarre experimentation involving cloaking electro optical camouflage so extreme it renders observers practically invisible from a distance of some meters by the Department of Homeland Security Hallucination Perhaps except Robert Guffey an English teacher and Dion's friend tracked down and interviewed one of the scientists behind the project codenamed Chameleo experimental technology which appears to have been stolen by the U S Department of Defense and deployed on American soil More shocking still Guffey discovered that the DoD has been experimenting with its newest technologies on a number of American citizens A condensed version of this story was the cover feature of Fortean Times Magazine September 2013
