Cfo Insights Achieving High Performance Through Finance Business Process Outsourcing:

CFO Insights Stewart Clements, Michael Donnellan, Cedric Read, 2005-08-19 Many CFOs have led their companies to invest in ERP and shared services in order to create leaner more global organization structures Today they seek more radical transformation through business process outsourcing BPO CFO Insights is a practical comprehensive guide to this exciting fast growing field It features expert advice from the CFOs of major companies worldwide including BP Procter Gamble Dell and Exel Step by step it takes you through the stages of a successful outsourcing solution from evaluating providers and contracting through transition planning and risk management We have seen cost reductions every year for each of the 13 years of our outsourcing experience now finally we are seeing the outsourcing market mature The advancement of multi client centers will create new value As new low cost centers spring up around the world I want to have easy access to the opportunities Alan Eilles CFO Downstream BP Outsourcing is not about sitting still On the one hand as CFO you have to be in control and have the right control mechanisms in place On the other this is an evolving relationship where both parties feel empowered and energized to make a real difference in the business John Coghlan Group Finance Director of Exel My view of the CFO's role is relatively simple How do you add value The CFO has to be in the forefront in understanding at a strategic level the relative economics of different parts of the business model and vitally play a decisive role in deciding what should be insourced and what should be outsourced Clayton Daley CFO Procter Gamble *CFO Insights* C. Cristian Wulf, 2006-07-28 The benefits Carrefour achieved have been substantially in excess of predictions The Shared Service accounting centers enabled streamlined processes lowered costs and introduced standard processes a standard system and standard data for a global company The new infrastructure can support rapid expansion and can add new stores with the flip of a switch From a systems point of view Carrefour now has a factory in place to deliver high efficiency systems tools processes and training From Chapter 9 Implementation and Operational Imperatives for ERP The benefits of efficient information delivery are demonstrated by the results of one of the world's largest mySAP.com implementations Siemens achieved a twenty five percent cost reduction through streamlined information delivery and improved access to financial information It also enhanced its reporting capabilities from seventy percent to nearly 100 percent through increased intranet availability From Chapter 3 Financial and Management Reporting Research shows that high performance businesses and governments use finance technology as one of the capabilities to help executives make better decisions for resource allocation while at the same time increasing productivity CFO Insights Enabling High Performance through Leading Practices for Finance ERP includes a number of case studies and lessons learned from Accenture clients across a variety of industries that have implemented upgraded and operated Oracle PeopleSoft and SAP Each case study highlights vital thoughts benefits and considerations and provides relevant guidance as one proceeds with an ERP on the journey toward high performance **CFO Insights** Michael R. Sutcliff, Michael Donnellan, 2006-05-12 CFO Insights Delivering High

Performance explores the implications of Accenture's high performance finance research and interprets the link between high performance business and the role of the CFO in delivering this. Written from the perspective of the Chief Financial Officer, the book provides real world relevant examples including flagship interviews with CFOs of high performing businesses. The book also includes industry analyses prepared by the Accenture Strategy and Business Architecture Practice, case studies and chapters dedicated to the CFO and financial practices of Japan, China, Latin America and Eastern Europe.

Creating Value in a Regulated World Cedric Read, 2006-11-02 This book is about championing a move away from simply evaluating physical assets to understanding and evaluating the intangible value of an entity. It means moving beyond economic theory to reprioritise and change the organisation so that further value can be created via processes, systems, measures, skills, knowledge and strategy. It is also about mapping the intangible value chain. The book looks at value networks and using real life projects asks questions such as: What do company value networks look like? How are they used to create value? How can one value the value chain? What lessons can be learnt from companies with high value networks as opposed to companies with low value networks? What is the impact on finance disciplines, processes, measures, systems and skills? These answers to these questions as provided by the case studies and interviews with CFOs from the companies involved will help to improve focus, improve shareholder value, improve transparency both internally and externally, cut waste in the current decision support structure and prevent inadequate decision making and lost opportunity. **Scott on Outsourcing** Michael

Dennis Scott, 2006 It's been going on for decades. But today more firms than ever are using outsourcing to help cut costs, improve business processes and focus on their core business. The most successful of these companies are the best informed. Whether you're just *Robotic Process Automation* Christian Czarnecki, Peter Fettke, 2021-05-10 This book brings together experts from research and practice. It includes the design of innovative Robot Process Automation (RPA) concepts, the discussion of related research fields e.g. Artificial Intelligence (AI), the evaluation of existing software products and findings from real life implementation projects. Similar to the substitution of physical work in manufacturing, blue collar automation, Robotic Process Automation tries to substitute intellectual work in office and administration processes with software robots, white collar automation. The starting point for the development of RPA was the observation that despite the use of process oriented enterprise systems such as ERP, CRM and BPM systems, additional manual activities are still indispensable today. In the RPA approach, these manual activities are learned and automated by software robots either by defining rules or by observing manual activities. RPA is related to business process management, machine learning and artificial intelligence. Tools for RPA originated from dedicated stand alone software. Today RPA functionalities are also integrated into elaborated process management suites. From a conceptual perspective, RPA can be structured into input components (sensors in the wide sense), an intelligence center and output components (actuators in the wide sense). From a strategic perspective, the impact of RPA can be related to the support of existing tasks, the complete substitution of human activities and the innovation of processes.

as well as business models At present high expectations are related to the use of RPA in the improvement of software supported business processes Manual activities are learned and automated by software robots that interact with existing applications via the presentation layer In combination with artificial intelligence AI as well as innovative interfaces e g voice recognition RPA creates a novel level of automation for office and administration processes Its benefit potential reaches a return on investment ROI up to 800% that is documented in various case studies *Финансовая аналитика: проблемы и решения No 27 (309) 2016*, 2017-05-20 **Aktuelle Forschungsfragen im Dienstleistungsmarketing** Christoph Bayer, Bernd Stauss, 2009-03-05 Der Sammelband enth lt Beitr ge zum 13 Dienstleistungsmarketing Workshop der im Jahre 2008 vom Lehrstuhl f r Dienstleistungsmanagement an der Katholischen Universit t Eichst tt Ingolstadt ausgerichtet wurde Die Aufs tze geben einen berblick zu aktuellen marketingpolitischen Fragen in Dienstleistungsunternehmen **I sistemi informativi gestionali** Alberto Quagli, Renata Paola Dameri, Iacopo E.
