Reorganizing Popular Politics Ruth Berins Collier, Samuel Handlin, 2015-10-29 A historic shift has occurred in the organizational structures through which the lower classes in Latin America express voice and find political representation With the political and economic reforms of the 1980s and 1990s networks of community based associations and nongovernmental organizations replaced party affiliated labor unions as the predominant organizations to which the lower classes turned This volume examines the new interest regime in Argentina Chile Peru and Venezuela through two extensive surveys one of individuals and one of associations undertaken in those nations capital cities Contrary to common perceptions the new interest regime is neither a vibrant autonomous civil society nor a set of weak atomized organizations Participation in associations is generally high compared to direct action as a strategy for pursuing collective interests and associations more frequently coordinate and engage the state than has sometimes been assumed However various forms of interaction with the state pose a classic trade off between representation and state control and the new interest regime is marked by representational distortion in that the lower classes are less likely to use the new structures than the middle classes Within these general patterns distinct national models are emerging This volume represents the most ambitious and systematic effort to date to examine individual participation and associational life in Latin America and to carry out a cross national analysis of new forms of political representation

Becoming a Movement Priska Daphi, 2017-08-04 Social movement scholars have become increasingly interested in the role of stories in contentious politics. Stories may facilitate the mobilization of activists and strengthen the resonance of their claims within public discourse and institutional politics. This book explores the role of narratives in building collective identity, a vital element in activists' continued commitment. While often claimed important, the connection between narratives and movement identity remains understudied. Drawing on a rich pool of original data, the book's analysis focusses on the Global Justice Movement (GJM), a movement known for its diversity of political perspectives. Based on a comparison of different national constellations of the GJM in Europe, the book demonstrates the centrality of activists' narratives in forming and maintaining movement identity and in making the GJM more enduring.
