Change The Basic Feature Of Existence:

Kierkegaard and the Changelessness of God Craig A. Hefner, 2023-08-22 Living what he perceived to be a culturally lukewarm Christianity S ren Kierkegaard was often critical of his contemporary church This volume explores his reading of Scripture and theology to argue not only that he was a modern defender of the doctrine of divine immutability but that his theology can be a surprising resource today Debates in the Metaphysics of Time L. Nathan Oaklander, 2014-11-20 A selection of lively debates in the philosophy of time that outline defend and object to contemporary issues in metaphysics consciousness and God **Vulnerability and Glory** Kristine A. Culp, 2010-10-28 Disasters indicate the complex peril of earthly existence Suffering and risk are global realities Yet the biblical depiction of persons and communities as earthen vessels also suggests that vulnerable creatures can be strengthened to receive and bear the grace and glory of God Culp demonstrates how vulnerability to devastation and to transformation is the very basis for life before God The glory of God may be witnessed in resistance to inhumanity and idolatry and expressed in delight and gratitude for the good gifts of life

The Concept of Existence in the Concluding Unscientific Postscript R.H. Johnson, 2012-12-06 The writings of Kierkegaard continue to be a fertile source for contemporary philosophical thought Perhaps the most interesting of his works to a philosopher is the Concluding Unscientific Postscript to the Philosophical Fragments The Fragments is a brief algebraic piece in which the author attempts to put forward the central teachings of Christianity in philosophical terminology The work is addressed to a reader who has a philosophical bent and who may therefore be tempted to relate to Christianity via such questions as Can the truth of Christianity be established The analysis of the Fragments establishes that this way of relating to Christianity is misguided since Christianity and philosophy are categorically different Having done this the author turns his attention in the Postscript to the question of how an individual human being can properly establish a relationship to Christianity In order to become a Christian one must first of all exist Nothing more than thatP one may be tempted to think Yet at the very core of the Postscript is the notion that to exist as an individual human being is difficult The author goes so far as to claim that men have forgotten what it means to exist *Handbook of Life-Span Development* Karen L. Fingerman, Cynthia Berg, Jacqui Smith, Toni C. Antonucci, 2010-12-25 The handbook is an impressive collection of research studies and theories provided by knowledgeable contributors on life span development from conception to old age Anthropology and Aging Quarterly The doubling of our average life span since the turn of the 20th century is considered by many scholars to be one of the most important changes in human existence This definitive text is the only volume to fully address through a multidisciplinary perspective the biological cognitive and psychological development that occurs from infancy through old age and how the sociocultural and institutional factors interface with these changes Edited by leading research scholars in the field of life span development the volume also includes contributions of specialists in behavioral genetics socioemotional selectivity theory neuroscience ecological models and more It examines the dynamics of close

Being in Time Shimon Edelman, Tomer Fekete, Neta Zach, 2012 Given that a representational system's phenomenal experience must be intrinsic to it and must therefore arise from its own temporal dynamics consciousness is best understood indeed can only be understood as being in time Despite that it is still acceptable for theories of consciousness to be summarily exempted from addressing the temporality of phenomenal experience The

chapters comprising this book represent a collective attempt on the part of their authors to redress this aberration The diverse treatments of phenomenal consciousness range in their methodology from philosophy through surveys and synthesis of behavioral and neuroscientific findings to computational analysis This collection s broad scope and integrative approach characterized by the view of the brain as a dynamical system that computes the mind s representation space will be of interest to researchers instructors and students in the cognitive sciences wishing to acquaint themselves with the current thinking in consciousness research Series B The Fortnightly ,1924 Earth System History Steven M. Stanley,2004-10-29 Designed for a new generation of readers Stanley s Earth System History is a reworking of his Exploring Earth and Life Through Time Adopting an earth system approach throughout Earth System History shows students how Earth s ecosystem has developed over time and how events in the past provide a perspective for dealing with present and future changes Clear and concise the new Second Edition of this introduction to historical geology is perfect for one term non majors courses and contains lots of new content and improved visuals *Behind the Crisis* Guglielmo Carchedi,2010-12-17 Drawing on modern philosophy of science epistemology economics and sociology this work retraces Marx s original multi disciplinary project and develops its foundations into a modern Marxist paradigm capable of understanding the present crisis and of challenging contemporary capitalism **Death and Eternal Life** John Hick,1994-01-01 In this cross cultural interdisciplinary study John Hick draws upon major world religions as well as biology psychology parapsychology anthropology and philosophy to explore the mystery of death He argues that scientific and philosophical objections to the idea of survival after death can be challenged and he claims that human inadequacy in facing suffering supports the basic religious argument for immortality *Centennial Year Number* James K. Feibleman,Paul G. Morrison,Andrew J. Reck,Harold N. Lee,Edward G. Ballard,Richard L. Barber,Carl H. Hamburg,Robert C. Whittemore,2012-12-06 The year 1959 has been called The Centennial Year in view of the anniversary of the publication of The Origin of Species and the centenary of the births of many who later contributed much to the philosophy of the recent past such as Samuel Alexander Henri Bergson John Dewey and Edmund Husserl The essays in the present volume which are on subjects germane to any of the anniversaries celebrated this year have been placed first in the present volume CENTENNIAL YEAR NUMBER DARWIN AND SCIENTIFIC METHOD JAMES K FEIBLEMAN The knowledge of methodology which is acquired by means of formal education in the various disciplines is usually communicated in abstract form Harmony and counterpoint in musical composition the axiomatic method of mathematics the established laws in physics or in chemistry the principles of mathematics all these are taught abstractly It is only when we come to the method of discovery in experimental science that we find abstract communication failing The most recent as well as the greatest successes of the experimental sciences have been those scored in modern times but we know as yet of no abstract way to teach the scientific method The astonishing pedagogical fact is that this method has never been abstracted and set forth in a fashion which would permit of its easy acquisition Here is an

astounding oversight indeed for which the very difficulty of the topic may itself be responsible
