Change From To Word:

Word Embeddings: Reliability & Semantic Change J. Hellrich, 2019-08-08 Word embeddings are a form of distributional semantics increasingly popular for investigating lexical semantic change. However, typical training algorithms are probabilistic, limiting their reliability and the reproducibility of studies. Johannes Hellrich investigated this problem both empirically and theoretically and found some variants of SVD-based algorithms to be unaffected. Furthermore, he created the JeSemE website to make word embedding-based diachronic research more accessible. It provides information on changes in word denotation and emotional connotation in five diachronic corpora. Finally, the author conducted two case studies on the applicability of these methods by investigating the historical understanding of electricity as well as words connected to Romanticism. They showed the high potential of distributional semantics for further applications in the digital humanities.

Prayer: a Force That Causes Change David Williamson, 2008-06-25 This book is a call to prayer, a call from lethargy and apathy that is so common today to effective prayer. This is a call to unlimited prayer, prayer that has great power and obtains wonderful results. Christian prayer is a source of great blessing and it is a means of focusing God's power and might on our needs and problems. It brings great answers if we will pray. Why limit prayer when God gives breathtaking answers when we pray? Prayer has great power and brings wonderful results. It is like unleashing a dam of water; the pent-up power rushes out of the reservoir and the power affects everything it contacts; it brings change. This book is a series of articles on prayer. A Call to Prayer is the first of four volumes on the prayer life. These articles were originally published in the online newsletter Voice of Thanksgiving. The articles are intended as lessons in prayer, written to promote thinking about prayer and to encourage further exploration of an effective prayer life. They were also written to foster a growth in devotion to God and the Christian life of faith. These articles are intended to encourage going to the Holy Spirit School of Christian life and prayer, where we learn to pray, not just prayers but effective, faith-filled prayers.

Morphologie G. E. Booij,Christian Lehmann,Joachim Mugdan,2000 This series of HANDBOOKS OF LINGUISTICS AND COMMUNICATION SCIENCE is designed to illuminate a field which not only includes general linguistics and the study of linguistics as applied to specific languages but also covers those more recent areas which have developed from the increasing body of research into the manifold forms of communicative action and interaction For classic linguistics there appears to be a need for a review of the state of the art which will provide a reference base for the rapid advances in research undertaken from a variety of theoretical standpoints while in the more recent branches of communication science the handbooks will give researchers

both an overview and orientation To attain these objectives the series will aim for a standard comparable to that of the leading handbooks in other disciplines and to this end will strive for comprehensiveness theoretical explicitness reliable documentation of data and findings and up to date methodology The editors both of the series and of the individual volumes and the individual contributors are committed to this aim The languages of publication are English German and French The main aim of the series is to provide an appropriate account of the state of the art in the various areas of linguistics and communication science covered by each of the various handbooks however no inflexible pre set limits will be imposed on the scope of each volume The series is open ended and can thus take account of further developments in the field This conception coupled with the necessity of allowing adequate time for each volume to be prepared with the necessary care means that there is no set time table for the publication of the whole series Each volume will be a self contained work complete in itself The order in which the handbooks are published does not imply any rank ordering but is determined by the way in which the series is organized the editor of the whole series enlist a competent editor for each individual volume Once the principal editor for a volume has been found he or she then has a completely free hand in the choice of co editors and contributors The editors plan each volume independently of the others being governed only by general formal principles The series editor only intervene where questions of delineation between individual volumes are concerned It is felt that this modus operandi is best suited to achieving the objectives of the series namely to give a competent account of the present state of knowledge and of the perception of the problems in the area covered by each volume

Mechanisms of Syntactic Change Charles N. Li, 1977-09-01 Historical linguistics the oldest field in linguistics has been traditionally dominated by phonological and etymological investigations Only in the late twentieth century have linguists begun to focus their interest and research on the area of syntactic change and the insight it provides on the nature of language This volume represents the first major contribution on the mechanisms of syntactic change The fourteen articles that make up this volume were selected from the Symposium on the Mechanisms of Syntactic Change held at the University of California Santa Barbara in 1976 one of a series of three conferences sponsored by the National Science Foundation These papers clearly demonstrate that the generative approach to the study of language does not explain diachronic processes in syntax This collection is enlightening provocative and carefully documented with data drawn from a great variety of language families
