Diverse Learners with Exceptionalities Gwendolyn Cartledge, Ralph Gardner, Donna Y. Ford, 2009

This text focuses on the special needs of culturally and racially diverse learners with exceptionalities. The culturally and linguistically diverse learner is profiled in terms of disproportionate positions within our society and schools. A case is made for why intense attention is needed for this population, the points of greatest need for this population, and why certain types of instruction are more appropriate for those students with the most significant educational needs. The text discusses the nature of culture and cultural linguistic diversity in the United States, the exceptional learner, those with both disabilities and gifts, assessment/testing issues, family issues, ways to prevent academic and social problems through early intervention, and methods for teaching both social and academic behaviors. Additionally, the text provides community and study skill content that are especially important for CLDE learners. Highlights of this First Edition: An exclusive and in-depth focus of culturally and linguistically diverse learners with exceptionalities helps educators meet the challenge of increasing the achievement of CLDE youth to meet national standards. Introductory guiding questions give the reader an overview of the chapter and prepare the reader for the content of the chapter. Teacher Tips help to recapture the main points of the preceding text and give the reader very specific steps for applying the suggested procedures and strategies. Introductory Vignettes authenticate the content of each chapter by demonstrating the unique conditions of CLD students with exceptionalities. Many of the vignettes are revisited at later points in the chapter to provide examples of how the concepts in the chapter related to CLDE learners. Applications give explicit examples of how the information can be used in the classroom. They take the guesswork out of taking theory to practice. Related Learning Activities found at the end of each chapter. They are largely applied so that the reader will try out the suggested strategies with actual CLDE populations. *Teaching Diverse Learners* Amy J.

You will find in this important volume many resources to guide your own decision making and development of successful collaboration programs in depth analyses of collaborative efforts, multiple ways to think about collaboration and its implementation, and examples of collaborative projects that are successfully in place in schools throughout the United States. Social and Emotional Development for Diverse Learners Lan Yang, Jiesi Guo, Ricci W. Fong, 2025-07-16 This book examines the needs, psychological agents, practices, and interventions that are pertinent to developing social and emotional competence among students with diverse needs in the 21st century. It attends to a range of contemporary developmental issues, strategies, and sociocultural contexts that have been much overlooked in the special and inclusive education arena by showcasing a series of empirical, meta-analytical, and review papers. While much has been written about various types of special educational needs, this book takes a broader view of the discipline by capturing topics that are not only related to students with special educational needs but also those related to twice exceptional students, left-behind children of Chinese migrant parents, sexually diverse students, and students who are disadvantaged in various ways. It focuses on developing social and emotional well-being among diverse learners for the 21st century. Contemporary issues such as developing students' adaptability, addressing sexuality issues in school, promoting teachers' emotional well-being, nurturing talents, and supporting left-behind children are challenges that researchers, educators, and policymakers have to attend to in the coming decades. This book offers valuable insights into addressing some of these key 21st-century challenges in special and inclusive education. Showcasing an Asian perspective, this book opens readers to empirical findings, issues, and practices beyond the Anglosphere. Taken together, this book is a valuable addition to readers' collections within the spectrum of practices and perspectives offered by scholars and practitioners from both Western and Asian contexts. This book serves as a helpful resource for researchers, educators, counselors, and policymakers who are interested in enhancing the social and emotional development of diverse learners.
