

Differentiating Instruction With Menus for the Inclusive Classroom: Math for grades 6–8 offers teachers everything needed to create a student-centered learning environment based on choice. This book provides six different types of menus that students can use to select exciting products that they will develop so teachers can assess what has been learned—instead of using a traditional worksheet format. Topics addressed include numbers and operations, geometry, graphing and measurements, and basic algebra.

Differentiating Instruction With Menus for the Inclusive Classroom: Math provides numerous types of leveled menus that lower and on-level middle-school-aged students can use to select exciting products to demonstrate learning. Menus with similar formats but geared toward varying ability levels allow teachers to differentiate easily. Using the creative and challenging choices found in Meal menus, Tic-Tac-Toe menus, List menus, 20-50-80 menus, Baseball menus, and Game Show menus, students will look forward to sharing their newfound knowledge throughout the year. Also included are specific guidelines for products, rubrics for assessing student products, and teacher introduction pages for each menu. This is a must-have for any teacher wanting to differentiate for a wide range of learners!

Laurie E. Westphal was a teacher for more than 15 years and now works as an independent gifted education consultant, educating teachers nationwide about using differentiation to meet the needs of all learners. She has written many books on the topic of differentiation, including the *Differentiating Instruction With Menus* series and the *Differentiating Instruction With Menus for the Inclusive Classroom* series.
