Clemens,2004

Student friendly and professor endorsed Dynamics of International Relations is an innovative introductory level core text It compares realist and idealist theories and the paradigm of interdependence against case studies of recurrent problems why wage war how to make peace how to transcend conflict when and where to mediate how to increase GDP but also quality of life and how to organize for peace and promote human rights Against a backdrop of the threat of terrorism Clemens clearly demonstrates both the danger and opportunities inherent in a growing global interdependence   **Diplomatic Material** Jason Dittmer,2017-08-24 In Diplomatic Material Jason Dittmer offers a counterintuitive reading of foreign policy by tracing the ways that complex interactions between people and things shape the decisions and actions of diplomats and policymakers Bringing new materialism to bear on international relations Dittmer focuses not on what the state does in the world but on how the world operates within the state through the circulation of humans and nonhuman objects From examining how paper storage needs impacted the design of the British Foreign Office Building to discussing the 1953 NATO decision to adopt the 30 caliber bullet as the standard rifle ammunition Dittmer highlights the contingency of human agency within international relations In Dittmer s model which eschews stasis structural forces and historical trends in favor of dynamism and becoming the international community is less a coming together of states than it is a convergence of media things people and practices In this way Dittmer locates power in the unfolding of processes on the micro level thereby reconceptualizing our understandings of diplomacy and international relations
