The ability to adapt to these new technological environments and the extent to which an individual embraces them has become critical to an individual's well-being and quality of life, the underlying assumption being that only by effectively engaging with digital technologies can the user accrue benefits from the experience. By introducing the concept digital capital which refers to the conditions that determine how people access, use, and engage with digital technology, Park examines how the digital ecosystem of the user leads to new forms of digital inequality. Using numerous empirical studies on internet users and non-users as well as recommending small, localized solutions to the big global problem, a critical and alternative perspective of the digital divide is provided.

*Nonprofit Digital Transformation Demystified* Ali A. Gooyabadi, Zahra GorjianKhanzad, Newton Lee,2023-12-14 In this compelling journey into Digital Transformation (DT) tailored for Nonprofit Organizations (NPOs), this book unravels the intricacies of technological integration. Grounded in over one hundred years of extensive research by authors and the editor, real-world examples and using the San Diego Diplomacy Council (SDDC) as a primary case study, it introduces a tailored Digital Maturity Model (DMM) for NPOs. At the heart of this transformation are three pivotal pillars: Culture, Ethics, and Security. Part I sets the stage, painting a landscape of how NPOs have intertwined with the digital realm. As technology's omnipresence surges, Chapter Two offers a panorama of DT's historical and contemporary intersections with the nonprofit sector. The subsequent chapter emphasizes the stark reality for many NPOs: digital adaptation is no longer about relevance but survival. Part II delves into the comparative digital strategies of NPOs and their for-profit counterparts in Chapter 4, highlighting the need for tailored approaches. Chapter 5 explores the Nonprofit Digital Maturity Model (NDMM) using the San Diego Diplomacy Council as a focal point. The journey then unfolds further in Chapter 6, which casts a spotlight on the strategic execution of DT in NPOs, weaving in comprehensive analyses to dissect the forces shaping an NPO's digital trajectory. Part III dives deeper with Chapter 7 laying the foundation of the NDMM. The subsequent chapter meticulously unpacks the NDMM, culminating in Chapter 9, which emphasizes the pillars of DT: Culture, Ethics, and Security, forming the essence of the Nonprofit DT Strategic Framework (NDTSF). This chapter also crafts a tailored roadmap for NPOs, charting a comprehensive DT course. Concluding with a forward-looking stance, Chapter 10 thrusts readers into the enthralling fusion of AI and NPOs, exploring transformative potentials and ethical concerns. Through real-world cases, it positions AI as both a potent tool and a vital dialogue for NPOs. Essentially, this book equips NPOs with tools like the NDMM and insights from successful DT narratives. It seeks to provide a practical guide for nonprofits through their DT journey, ensuring they harness technology ethically and effectively without compromising their core values.

*Public engagement in policy making* Great Britain: Parliament: House of Commons: Public Administration Select Committee,2013-06-03 In this report the Public Administration Select Committee PASC calls for a wiki approach to policy making where public opinion ideas and contributions are sought and welcome at any and all stages of the policy cycle The Government should be able to demonstrate that it has adopted this approach alongside ministerial leadership and responsibility for policy and its outcomes All policy making carries risks a lack of appetite for participation disappointment arising from unrealistic expectations and the dominance of vested interests Government must frankly assess and address these risks in relation to open policy making Digital technology has a significant role to play in opening up policy making Government could and should go further and embrace radical and innovative approaches making use of existing platforms and technologies such as Twitter The success and impact of public engagement in policy making must be effectively measured Government must able to demonstrate value for money and improved outcomes with this new approach particularly in a time of austerity The Committee says proposals for both open and contestable policy making demonstrate that Government recognises the value of public opinion in helping to identify problems and develop solutions However for open policy making to work it must be a genuine departure from more traditional forms of policy making where public engagement has usually only occurred after the Government has already determined a course of action Care must be taken to ensure that open policy making processes are not dominated by vested interests or the usual suspects who are aware of policy opportunities
