**Sciences and Humanities, Arts and Humanities Stream (AHS-APRISH 2019)** Shuri Mariasih Gietty Tambunan, 2023-05-27 This is an open access book According to Castells power now rests in networks the logic of the network is more powerful than the powers of the network quoted in Weber 2002 p 104 it is whether nation states or local communities are deeply affected especially by inclusion in and exclusion from the global networks that structure a various sectors in society at any level Thus it is also crucial look closely at exclusion from and inclusion in different kinds of social structures where connectivity and access to networks are essential being aware that people at the bottom are those who with nothing to offer the network are excluded Castells arguments shows us how the new forms of network society offer challenges in a way that despite the disappearance of conventional ties exploitation marginalization exclusion and differentiation remain In what follows scholarships are invited to build an academic discussion on characterizing the structure and dynamics of societies in the world of the twenty first century Thus scholar may come to look at the meaning of being in a network society by examining the role of network society within the complexity of socio cultural political and economic circumstances in strengthening the role of science in overcoming local national regional and global problems But scientific research is also required to identify a wide variety of solutions to societal problems enhanced by the network society which no longer relate solely to a particular discipline but are multi and trans disciplinary In addition recent research has changed the traditional role of academia demanding more collaboration in the production of science not only among universities but also among researchers social practitioners and policymakers Considering these issues the fourth Asia Pacific Research in Social Sciences and Humanities APRiSH will be hosted by the Faculty of Social and Political Sciences Universitas Indonesia FISIP UI in 2019 under the theme The Network Society Continuity and Change Scientific inputs from all parts of the world are welcome academically and practically Various perspectives based on mono disciplinary multi disciplinary or trans disciplinary research are expected to examine the problems and contribute to solutions *Replayed*

Henry Lowood, 2023-06-06 The purpose of this book is to consolidate the author's far-flung publications into a single work to give students and scholars the opportunity to read and teach his scholarly output as a single corpus of thought. This book offers the author's most significant pieces on game history, game historiography, software preservation, software collections, virtual worlds, machinima, play capture, and documentation. *Digital Scholarly Editions Beyond Text* Tessa Gengnagel, 2024-02-07 Scholarly editions contextualize our cultural heritage. Traditionally, methodologies from the field of scholarly editing are applied to works of literature, e.g., in order to trace their genesis or present their varied history of transmission. What do we make of the variance in other types of cultural heritage? How can we describe, record, and reproduce it systematically? From medieval to modern times, from image to audiovisual media, the book traces discourses across different disciplines in order to develop a conceptual model for scholarly editions on a broader scale. By doing so, it also delves into the theory and philosophy of the digital humanities as such. *Digital Humanities* Olivier Le Deuff, 2018-04-16 Where do the digital humanities really come from? Are they really new? What are the theoretical and technical influences that participate in this scientific field that arouses interest and questions? This book tries to show and explain the main theories and methods that have allowed their current constitution. The aim of the book is to propose a new way to understand the history of digital humanities in a broader perspective than the classic history with the project of Robert Busa. The short digital humanities perspective neglects lots of actors and disciplines. The book tries to show the importance of other fields than humanities computing, like scientometry, infometry, econometry, mathematical linguistics, geography, and documentation. *Laying the Foundation* John W. White, Heather Gilbert, 2016-03-15 Laying the Foundation: Digital Humanities in Academic Libraries examines the library's role in the development, implementation, and instruction of successful digital humanities projects. It pays special attention to the critical role of librarians in building sustainable programs. It also examines how libraries can support the use of digital scholarship tools and techniques in undergraduate education. Academic libraries are nexuses of research and technology as such; they provide fertile ground for cultivating and curating digital scholarship. However, adding digital humanities to library service models requires a clear understanding of the resources and skills required. Integrating digital scholarship into existing models calls for a reimagining of the roles of libraries and librarians. In many cases, these reimagined roles call for expanded responsibilities, often in the areas of collaborative instruction and digital asset management, and in turn, these expanded responsibilities can strain already stretched resources. Laying the Foundation provides practical solutions to the challenges of successfully incorporating digital humanities programs into existing library services. Collectively, its authors argue that librarians are critical resources for teaching digital humanities to undergraduate students and that libraries are essential for publishing, preserving, and making accessible digital scholarship. *The Theory and Craft of Digital Preservation* Trevor Owens, 2018-12-11 A guide to managing data in the digital age. Winner of the ALCTS Outstanding Publication Award by the Association for Library Collections, it is a complex issue with a significant ethical

dimension It is a vocation In *The Theory and Craft of Digital Preservation* librarian Trevor Owens establishes a baseline for practice in this field In the first section of the book Owens synthesizes work on the history of preservation in a range of areas archives manuscripts recorded sound etc and sets that history in dialogue with work in new media studies platform studies and media archeology In later chapters Owens builds from this theoretical framework and maps out a more deliberate and intentional approach to digital preservation A basic introduction to the issues and practices of digital preservation the book is anchored in an understanding of the traditions of preservation and the nature of digital objects and media Based on extensive reading research and writing on digital preservation Owens s work will prove an invaluable reference for archivists librarians and museum professionals as well as scholars and researchers in the digital humanities Fans and Videogames Melanie Swalwell,Angela Ndalanian,Helen Stuckey,2017-03-03 This anthology addresses videogames long history of fandom and fans important role in game history and preservation In order to better understand and theorize video games and game playing it is necessary to study the activities of gamers themselves Gamers are active creators in generating meaning they are creators of media texts they share with other fans mods walkthroughs machinima etc and they have played a central role in curating and preserving games through activities such as their collective work on emulation creating online archives and the forensic archaeology of code This volume brings together essays that explore game fandom from diverse perspectives that examine the complex processes at work in the phenomenon of game fandom and its practices Contributors aim to historicize game fandom recognize fan contributions to game history and critically assess the role of fans in ensuring that game culture endures through the development of archives *Academic Writing, Real World Topics* Michael Rectenwald,Lisa Carl,2015-05-28 *Academic Writing Real World Topics* fills a void in the writing across the curriculum textbook market It draws together articles and essays of actual academic prose as opposed to journalism it arranges material topically as opposed to by discipline or academic division and it approaches topics from multiple disciplinary and critical perspectives With extensive introductions rhetorical instruction and suggested additional resources accompanying each chapter *Academic Writing Real World Topics* introduces students to the kinds of research and writing that they will be expected to undertake throughout their college careers and beyond Readings are drawn from various disciplines across the major divisions of the university and focus on issues of real import to students today including such topics as living in a digital culture learning from games learning in a digital age living in a global culture our post human future surviving economic crisis and assessing armed global conflict The book provides students with an introduction to the diversity complexity and connectedness of writing in higher education today Part I a short Guide to Academic Writing teaches rhetorical strategies and approaches to academic writing within and across the major divisions of the academy For each writing strategy or essay element treated in the Guide the authors provide examples from the reader or from one of many resources included in each chapter s Suggested Additional Resources Part II *Real World Topics* also refers extensively to the Guide Thus the Guide shows student writers
