Peter Kloos

De Prehistorie Van Nederland Economisch Technologisch:

Bronze Age Metalworking in the Netherlands (c. 2000-800 BC) M. H. G. Kuijpers, 2008 Almost fifty years ago J J Butler started his research to trace the possible remains of a Bronze Age metalworker's workshop in the Netherlands Yet while metalworking has been deduced on the ground of the existence of regional types of axes and some scarce finds related to metalworking the smith's workplace has remained elusive In this Research Master Thesis I have tried to tackle this problem I have considered both the social as well as the technological aspects of metalworking to be able to determine conclusively whether metalworking took place in the Netherlands or not The first part of the thesis revolves around the social position of the smith and the social organization of metalworking My approach entails a re evaluation of the current theories on metalworking which I believe to be unfounded and one sided They tend to disregard production of everyday objects of which the most prominent example is the axe The second part deals with the technological aspects of metalworking and how these processes are manifested in the archaeological record Based on evidence from archaeological sites elsewhere in Europe and with the aid of experimental archaeology a metalworking toolkit is constructed Finally a method is presented which might help archaeologists recognize the workplace of a Bronze Age smith *Archaeological and Historical Aspects of West-European Societies* Marc Lodewijckx, 1996 The contents of this volume of essays in his honour gives a good overview of the fields in which Prof Van Doorselaer has been active throughout his academic career This book is especially an Album Amicorum filled with reminiscences and intentions to continue the work The voluminous size of this book may be considered as an adequate measure of the overall sympathy for Prof Van Doorselaer We hope that this publication may encourage him to remain active in the field of archaeology and that the co operation among colleagues stimulated by this project may be continued in the future Nederland in de prehistorie L. P. Louwe Kooijmans, 2005 **Swifterbant Stones** Izabel Devriendt, 2014-09-18 In this research the stone and flint artefacts of the site Swifterbant are analysed Attention is focussed on the Neolithic occupation phase of the prehistoric creek system c 4300 4000 cal BC where archaeological traces were found on several levee and river dune sites This study shows that there is a larger variability in site types than originally presumed It is established that these sites are all part of one settlement system in which they all had a different function This thesis comprises a monograph on the research history of the site and the different aspects of the lithic research such as typological analysis technological attribute analysis raw material analysis and use wear analysis in combination with a detailed inventory catalogue All this leads to new insights into the use of lithic artefacts The importance of stone tool morphology the selective gathering of stone tool blanks or the use of two different flint production sequences are but a few of these interesting aspects Other topics concern tool function mobility raw material access and use cultural markers and social identity In combining the results from this research with that of other Swifterbant sites a better understanding of the different aspects of prehistoric stone and flint industries is gained **Huisplategronden in Nederland** A.G.

Lange, 2014-04-30 In de Nederlandse bodem zijn de resten van oudtijdse bewoning zelden als opgaande structuren terug te vinden. De enige archeologisch herkenbare sporen zijn meestal uitsluitend verkleuringen van de grond die laten zien waar de palen en de wanden van het huis hebben gestaan. Zij laten zo een afhankelijk van de omstandigheden meer of minder herkenbare plattegrond in de bodem achter. Huisplattegronden komen vaak in opgravingen in Nederland te voorschijn en behoren daarmee tot een van de meest onderzochte en meest intrigerende archeologische fenomenen. In dit boek schetsen archeologen de ontwikkeling van de huizenbouw vanaf de komst van de eerste boeren zo'n 7000 jaar geleden op de lss in Zuid-Limburg tot aan de dertiende eeuw in alle regio's met een uitstapje naar de huizenbouw in de Nieuwe Tijd. Het laat ook de lacunes van onze kennis zien op dit gebied en schetst de methodieken die wij willen gebruiken om het onderzoek verder te helpen. Huisplattegronden in Nederland is daarom in de eerste plaats een handboek voor archeologen. Maar ook studenten en liefhebbers van het archeologisch onderzoek zullen veel nieuwe kennis kunnen opdoen over de verschillende verschijningsvormen van gebouwen. We hopen dat ze worden gegrepen door deze bijzondere groep van archeologische gegevens en worden uitgedaagd mee te denken om de talloze vragen die nog resten te helpen onderzoeken.

The Prehistory of the Netherlands L. P. Louwe Kooijmans, 2005 This long awaited reference work offers a systematic description of developments in the Netherlands during the whole pre Roman period starting 250 000 years ago up until the Roman conquest of the southern part of the country.

Grazing and Conservation Management Michiel F. Wallis De Vries, Jan P. Bakker, Sipke E. Van Wieren, 2012-12-06 Grazing animals enjoy an ambiguous reputation in the field of nature conservation. Livestock are often treated as a scourge yet native large herbivores form the prime attraction of many a reserve. This book gives the first comprehensive overview of the use of grazing as a tool in conservation management. Considering in turn the ecological and historical background, the impact of grazing on community structure, management applications and future prospects, this book examines issues such as the role of herbivores as keystone species, the assessment of habitat quality and the function of scientific models in advancing grazing management. Large herbivores are shown to be potentially powerful allies in the management of nature reserves particularly in the maintenance, enhancement or restoration of biodiversity. *Grazing and Conservation Management* will appeal to conservation biologists and rangeland managers providing them with a clearer understanding of grazing and conservation management.
