Postcards Lydia Pyne,2021-10-13 A global exploration of postcards as artifacts at the intersection of history science technology art and culture Postcards are usually associated with banal holiday pleasantries but they are made possible by sophisticated industries and institutions from printers to postal services When they were invented postcards established what is now taken for granted in modern times the ability to send and receive messages around the world easily and inexpensively Fundamentally they are about creating personal connections links between people places and beliefs Lydia Pyne examines postcards on a global scale to understand them as artifacts that are at the intersection of history science technology art and culture In doing so she shows how postcards were the first global social network and also here in the twenty first century how postcards are not yet extinct

The Warrior State T.V. Paul,2014-01-02 Seemingly from its birth Pakistan has teetered on the brink of becoming a failed state Today it ranks 133rd out of 148 countries in global competitiveness Its economy is as dysfunctional as its political system is corrupt both rely heavily on international aid for their existence Taliban forces occupy 30 percent of the country It possesses over a hundred nuclear weapons that could easily fall into terrorists hands Why in an era when countries across the developing world are experiencing impressive economic growth and building democratic institutions has Pakistan been such a conspicuous failure In The Warrior State noted international relations and South Asia scholar T V Paul untangles this fascinating riddle Paul argues that the geostrategic curse akin to the resource curse that plagues oil rich autocracies is at the root of Pakistan s unique inability to progress Since its founding in 1947 Pakistan has been at the center of major geopolitical struggles the US Soviet rivalry the conflict with India and most recently the post 9 11 wars No matter how ineffective the regime is massive foreign aid keeps pouring in from major powers and their allies with a stake in the region The reliability of such aid defuses any pressure on political elites to launch the far reaching domestic reforms necessary to promote sustained growth higher standards of living and more stable democratic institutions Paul shows that excessive war making efforts have drained Pakistan s limited economic resources without making the country safer or more stable Indeed despite the regime s emphasis on security the country continues to be beset by widespread violence and terrorism In an age of transnational terrorism and nuclear proliferation understanding Pakistan s development particularly the negative effects of foreign aid and geopolitical centrality is more important than ever Painstakingly researched and brilliantly argued The Warrior State tackles what may be the world s most dangerous powder keg and uncovers the true causes of Pakistan s enormously consequential failure

Where Nation-States Come From Philip G. Roeder,2012-01-09 To date the world can lay claim to little more than 190 sovereign

independent entities recognized as nation states while by some estimates there may be up to eight hundred more nation state projects underway and seven to eight thousand potential projects Why do a few such endeavors come to fruition while most fail Standard explanations have pointed to national awakenings nationalist mobilizations economic efficiency military prowess or intervention by the great powers Where Nation States Come From provides a compelling alternative account one that incorporates an in depth examination of the Russian Empire the Soviet Union and their successor states Philip Roeder argues that almost all successful nation state projects have been associated with a particular political institution prior to independence the segment state a jurisdiction defined by both human and territorial boundaries Independence represents an administrative upgrade of a segment state Before independence segmental institutions shape politics on the periphery of an existing sovereign state Leaders of segment states are thus better positioned than other proponents of nation state endeavors to forge locally hegemonic national identities Before independence segmental institutions also shape the politics between the periphery and center of existing states Leaders of segment states are hence also more able to challenge the status quo and to induce the leaders of the existing state to concede independence Roeder clarifies the mechanisms that link such institutions to outcomes and demonstrates that these relationships have prevailed around the world through most of the age of nationalism

Age of Secession Ryan D. Griffiths, 2016-10-27 What are the factors that determine how central governments respond to demands for independence Secessionist movements are numerous and quite varied in form but the chief obstacle to their ambitions is the state itself which can deny independence demands deploy force if need be and request

that the international community respect its territorial integrity by not recognizing the breakaway region Age of Secession focuses on this crucial but neglected moment in the life of a secessionist movement Griffiths offers a novel theory using original data on secessionist movements between 1816 and 2011 He explains how state response is shaped by international and domestic factors when conflict is likely and why states have proliferated since 1945 He mixes quantitative methods with case studies of secessionist movements in the United Kingdom Russia Soviet Union and India This is an important book for anyone who wants to understand the phenomenon of secession

Historicizing Race Marius Turda, Maria Sophia Quine, 2018-02-22 The idea of race may be outdated as many commentators and scholars working in a broad range of different fields in the sciences and humanities have argued over many years Nevertheless it remains one of the most persistent forms of human classification Theories of race primitivism the idea that there is a natural racial hierarchy and ranking order of inferior and superior races race biologism the belief that

people can be classified by genetic features which are shared by members of racial groups and race essentialism the notion that races can be defined by scientifically identifiable and verifiable cultural and physical characteristics are deeply embedded in modern history culture and politics Historicizing Race offers a new understanding of this reality by exploring the interconnectedness of scientific cultural and political strands of racial thought in Europe and elsewhere It re conceptualises the idea of race by unearthing various historical traditions that continue to inform not only current debates about individual and collective identities but also national and international politics In a concise format accessible to students and scholars alike the authors draw out some of the reasons why race centred thinking has in recent years re emerged in such shocking and explicit form in current populist xenophobic and anti immigration movements **The Twentieth**

Rethinking Development Economics Ha-Joon Chang, 2003 Impressive provides a very good compendium of what are usually classified as heterodox development economics an excellent volume *Journal of International Development* This important new collection tackles the failure of neoliberal reform to generate longterm growth and reduce poverty in many developing and transition economies As dramatically demonstrated in the collapse of the WTO s Seattle talks there is increasing dissatisfaction in both developing and developed countries with the emerging neoliberal global economic order The resignations of Joseph Stiglitz and Ravi Kanbur from the World Bank emphasize that this disillusionment with the orthodoxy now exists at the very heart of the establishment Yet the increasing demand for an alternative to this orthodoxy is not being met Over the last few decades the older generation of development economists have been edged out of most major universities particularly in the USA The situation in most developing countries is even worse although there is more demand for alternatives to orthodox development economics these countries have even less capability to generate such alternatives *Rethinking Development Economics* is intended to fill this gap It addresses key issues in development economics ranging from macroeconomics finance and governance to trade industry agriculture and poverty Bringing together some of the foremost names in the field this comprehensive and timely collection constitutes a critical staging post in the future of development economics *Medicine and Care of the Dying* Milton James Lewis, 2007 This book is for palliative care practitioners and all health care professionals with an interest in end of life care **Nineteenth Century and After**, 1907

Encyclopedia of Death and Dying Glennys Howarth, Oliver Leaman, 2003-12-16 In recent years there has been a massive upsurge in academic professional and lay interest in mortality This is reflected in academic and professional literature in the popular media and in the proliferation of professional roles and training courses associated with aspects of death and dying Until now the majority of reference material on death and dying has been designed for particular disciplinary audiences and has addressed only specific academic or professional concerns There has been an urgent need for an authoritative but accessible reference work reflecting the multidisciplinary nature of the field This Encyclopedia answers

that need The Encyclopedia of Death and Dying consolidates and contextualizes the disparate research that has been carried out to date The phenomena of death and dying and its related concepts are explored and explained in depth from the approaches of varied disciplines and related professions in the arts social sciences humanities medicine and the sciences In addition to scholars and students in the field from anthropologists and sociologists to art and social historians the Encyclopedia will be of interest to other professionals and practitioners whose work brings them into contact with dying dead and bereaved people It will be welcomed as the definitive death and dying reference source and an essential tool for teaching research and independent study
