

de wrange vruchten heeft geplukt en eert door Prins Maurits met een simpele, in hoofdzaak rechthoekige grachtengordel werd omgeven. Deze laatste groep van kasteeldorpen overziende, kunnen wij dus vaststellen, dat de plattegronden bij al hun verscheidenheid naar hun innerlijke structuur over het geheel het rechthoekige type gerekend kunnen worden; naar hun uiterlijke ommuringsvorm echter overwegend tot het onregelmatige type behooren. Montfoort met zijn regelmatigen rechthoekigen aanleg en eveneens rechthoekige ommuring vormt hierop een uitzondering.

Architectuur Lokaal #12 , Population Forecasting 1895-1945 H.A. de Gans,2012-12-06 Authors scholars and scientists whose mother tongue is not one of the major languages of international communication are seriously disadvantaged Some individuals such as Joseph Conrad or Vladimir Nabokov have overcome that handicap brilliantly Others learn to live with it they can express themselves sufficiently lucidly in a second language to make their voice heard internationally At least when they have something original or striking to say they will be certain to reach their peers Most scientists and scholars fall into that category Others again have to wait until their work has been translated before its value is recognised This may apply even to those whose mother tongue is widely read The writings of Frenchmen Lyotard Derrida Baudrillard or Foucault on post modernism on language discourse and power for example had tremendous world wide impact only after English translations appeared on the market De Gans study of the development of population forecasting in The Netherlands is another striking illustration of the effects a language barrier may have He demonstrates convincingly that although a possibly somewhat awkward Dutchman named Wiebols was a pioneer of modern cohort component demographic forecasting he never received international recognition for this In his thesis of 1925 Wiebols employed the newest instruments of demographic analysis in improving forecasting methodology A History of Brewing in Holland, 900-1900 Richard Unger,2001-07-26 This book offers a comprehensive history of brewing in Holland from the beginnings of large scale production at the end of the first millennium through medieval expansion the boom of the Renaissance and the disastrous decline of the seventeenth and eighteenth centuries It closes with the revival of the industry in the era of industrialization Major technical innovations from Germany in the fourteenth and again in the nineteenth century made it possible for brewing to take a leading role in the Dutch economy The adaptation of those improvements went on always under the careful supervision of the state Relying on the extensive records of urban and provincial governments the author traces the cooperation as well as tension between brewers and public authorities spanning one thousand years Metropolis D. Halász,2013-11-21 Shaping Holland Jeroen van Schaick,Francisco Colombo,Peter Witsen,2022-03-29 All around the world regions are facing major challenges climate change the transition to renewable energy reinventing the food system ongoing urbanisation and finding room to sustain biodiversity These will radically transform our living and working environments Regional design uses the power of visualisation to unite regional players around appealing spatial development visions for meeting those challenges It offers a route to new forms of regional governance and planning that match the urgencies of our time This book exposes the benefits and the pitfalls of regional plans and designs Shaping Holland gives a unique insight into the emergence of contemporary regional planning and design practice in the Netherlands This densely populated country in the delta of the Rhine and Meuse rivers is internationally renowned for its urban planning and design tradition Drawing on first hand accounts and a rich collection of illustrations maps and diagrams the book gives pointers for practitioners

academics and students of spatial planning urban design and landscape architecture Regional design is on the rise in all continents It provides an answer to a world in which economic activities activity patterns urban growth and ecological systems are no respecters of administrative boundaries Amid the growing number of academic analyses of regional design this book is unique because it focuses on planning practice and first hand knowledge As such it is of interest to a broad international readership

Techniek in Nederland in de twintigste eeuw: Stad Bouw Industrie le Productie , 1998 Building Regulations and Urban Form, 1200-1900 Terry R. Slater, Sandra M.G. Pinto, 2017-09-20 Towns are complicated places It is therefore not surprising that from the beginnings of urban development towns and town life have been regulated Whether the basis of regulation was imposed or agreed ultimately it was necessary to have a law based system to ensure that disagreements could be arbitrated upon and rules obeyed The literature on urban regulation is dispersed about a large number of academic specialisms However for the most part the interest in urban regulation is peripheral to some other core study and consequently there are few texts which bring these detailed studies together This book provides perspectives across the period between the high medieval and the end of the nineteenth century and across a geographical breadth of European countries from Scandinavia to the southern fringes of the Mediterranean and from Turkey to Portugal It also looks at the way in which urban regulation was transferred and adapted to the colonial empires of two of those nations
