*Social Class and Stratification* Rhonda F. Levine, 2006 Bringing together various statements on social stratification this collection offers contributions to debates on the nature of race class and gender inequality **Class and Stratification** Rosemary Crompton, 2008-05-19 Back to definitions the approach developed in this book The possibility of countervailing processes Notes References Index End User License Agreement *Social Stratification* Daniel W. Rossides, 1976 [Social Stratification, Class, Race, and Gender in Sociological Perspective, Second Edition](#) David Grusky, 2019-09-05 The volume offers essential reading for undergraduates who need an introduction to the field for graduate students who wish to broaden their understanding of stratification research and for advanced scholars who seek a basic reference guide Although most of the selections are middle range theoretical pieces suitable for introductory courses the anthology also includes advanced contributions on the cutting edge of research The editor outlines a modified study plan for undergraduate students requiring a basic introduction to the field *Social Stratification and Inequality* Harold R. Kerbo, 1996 This text provides coverage of research and theory relating to social stratification in the US and selected international societies It adopts general conflict principles as its theoretical orientation and focuses on the development and maintenance of the structure of inequality This edition has been updated to include data from the 1990 census and features examples figures and tables A new chapter on race ethnicity and gender focuses on important issues of inequality There are also new chapters on Germany and on Japan [From Marx to Warner](#) Jacek Tittenbrun, 2018-04-18 The book offers an in depth analysis of several important theories of social class and stratification both past and present This critique is underpinned by a single coherent analytic framework organised around the notion of ownership This original approach allows the book to offer alternative treatments of the issues dealt with by the thinkers

discussed here The central argument here is that there are only two classical theories of social class namely those developed by Marx and Weber and this clear systematisation of the main attributes of approaches to class and stratification makes it possible to see that many theories traditionally considered as class ones refer in fact to social stratification

*Class* John Scott,1996

Stratification and Power John Scott,2014-04-03 This volume presents a systematic discussion of the leading theoretical approaches to social stratification It is both an accessible overview and a distinctive contribution to the analysis of class status and power John Scott argues that Max Weber's conceptual framework reconstructed and enlarged provides the basis for integrating what have been considered up to now as divergent approaches to stratification studies Marxist theories of class and economic division normative functionalist theories of status and cultural division and elitist theories of command and authoritarian division all find their place in the proposed framework Each theoretical approach is illustrated through empirical investigations undertaken by writers associated with them Recent work by Dahrendorf Wright and Goldthorpe is also examined and it is shown how their arguments contribute to a theoretical synthesis in the analysis of stratification

*Class, Race, and Gender in American Education* Lois Weis,1988-01-01 Most educators might agree that the hidden agendas on class race and gender to a large extent condition and determine the form and the content of schooling But how much of this situation is due to school factors and how much to social background factors is heatedly discussed and debated by scholars working within both the mainstream and critical traditions in the field of education Class Race and Gender in American Education represents a groundbreaking overview of current issues and contemporary approaches involved in the areas of class race and gender in American education In this book the first to combine a consideration of these issues and to investigate the manner in which they connect in the school experience authors consider the particular situations of males and females of divergent racial and class backgrounds from their earliest childhood experiences through the adult university years While providing valuable original in depth ethnographic and statistical analyses the volume also incorporates some of the important current theoretical debates the debate between structuralists and culturalists is highlighted for example
