

Enhancing clinical outcomes through anesthesia information management

Centricity[®] Perioperative features a robust Anesthesia Information Management System (AIMS) that was developed with the support of clinicians, technology experts, and hospital executives to streamline the capture, flow, and management of patient data throughout the perioperative process and throughout your facility.

This powerful yet highly flexible solution accelerates the usefulness of departmental information systems, patient monitoring, gas delivery devices, and document management systems to help you:

- Bring more efficiency to your OR and perioperative processes
- Maximize OR throughput and capacity
- Optimize charge capture and reimbursement

The result of this extensive collaboration with key healthcare professionals is a robust set of tools that can support your facility's efforts to consistently deliver high-quality, patient-focused care.

Intuitive design enables more focus on the patient

One of the primary benefits of Centricity Perioperative's Anesthesia module is its ease of use. Components can be easily customized to match your workflow, and more than 40 clinical scripts help guide anesthesia providers through each step of your individual care plans. This flexibility not only minimizes the time required to learn the system, it also speeds adoption among clinicians.

- Content-rich and highly flexible electronic patient assessment forms help ensure accurate documentation from admission to the PACU
- Comprehensive intra-operative documentation helps your team stay focused on the patient rather than on capturing data
- We are an industry leader in ease of use with deep perioperative expertise

Centricity Perioperative also offers integrated support for pro-fee billing, which reduces the time and cost required to capture professional fees by streamlining the submission and review process.
