T. Connolly, 2021-11-29 *The Green City and Social Injustice* examines the recent urban environmental trajectory of 21 cities in Europe and North America over a 20 year period It analyses the circumstances under which greening interventions can create a new set of inequalities for socially vulnerable residents while also failing to

eliminate other environmental risks and impacts Based on fieldwork in ten countries and on the analysis of core planning policy and activist documents and data the book offers a critical view of the growing green planning orthodoxy in the Global North It highlights the entanglements of this tenet with neoliberal municipal policies including budget cuts for community initiatives long term green spaces and housing for the most fragile residents and the focus on large scale urban redevelopment and high end real estate investment It also discusses hopeful experiences from cities where urban greening has long been accompanied by social equity policies or managed by community groups organizing around environmental justice goals and strategies The book examines how displacement and gentrification in the context of greening are not only physical but also socio cultural creating new forms of social erasure and trauma for vulnerable residents Its breadth and diversity allow students scholars and researchers to debunk the often depoliticized branding and selling of green cities and reinsert core equity and justice issues into green city planning a much needed perspective Building from this critical view the book also shows how cities that prioritize equity in green access in secure housing and in bold social policies can achieve both environmental and social gains for all

The Political Economy of Capital Cities Heike Mayer,Fritz Sager,David Kaufmann,Martin Warland,2017-09-11 Capital cities that are not the dominant economic centers of their nations so called secondary capital cities SCCs tend to be overlooked in the fields of economic geography and political science Yet capital cities play an important role in shaping the political economic social and cultural identity of a nation As the seat of power and decision making capital cities represent a nation s identity not only through their symbolic architecture but also through their economies and through the ways in which they position themselves in national urban networks The Political Economy of Capital Cities aims to address this gap by presenting the dynamics that influence policy and economic development in four in depth case studies examining the SCCs of Bern Ottawa The Hague and Washington D C In contrast to traditional accounts of capital cities this book conceptualizes the modern national capital as an innovation driven economy influenced by national local and regional actors Nationally overarching trends in the direction of outsourcing and tertiarization of the public sector influence the fate of capital cities Regional policymakers in all four of the highlighted cities leverage the presence of national government agencies and stimulate the economy by way of various locational policy strategies While accounting for their secondary status this book illustrates how capital city actors such as firms national regional and local governments policymakers and planning practitioners are keenly aware of the unique status of their city The conclusion provides practical recommendations for policymakers in SCCs and highlights ways in which they can help to promote economic development

An investigation of the practice of commoning in urban housing and its necessity for challenging economic injustice in our rapidly gentrifying cities Provoked by mass evictions and the onset of gentrification in the 1970s tenants in Washington D C began forming cooperative organizations to collectively purchase and manage their apartment buildings These tenants were creating a commons taking a resource housing that had been used to extract profit from them and reshaping it as a resource that was collectively owned by them In *Carving Out the Commons* Amanda Huron theorizes the practice of urban commoning through a close investigation of the city's limited equity housing cooperatives Drawing on feminist and anticapitalist perspectives Huron asks whether a commons can work in a city where land and other resources are scarce and how strangers who may not share a past or future come together to create and maintain commonly held spaces in the midst of capitalism Arguing against the romanticization of the commons she instead positions the urban commons as a pragmatic practice Through the practice of commoning she contends we can learn to build communities to challenge capitalism's totalizing claims over life

Voices for Transgender Equality Thomas J. Billard, 2024 Transgender rights have emerged as an important topic of everyday conversation across the country in recent years and become in many ways the flashpoint du jour of the American culture wars During the Trump presidency in particular transgender people were thrust onto the center stage of US politics Faced with unrelenting hostility and an increasingly complicated media system transgender activists crafted new communication strategies to fight for their equality stall attempts to undermine their rights and win the support of large swathes of the public In *Voices for Transgender Equality* Thomas J Billard offers an insider's view into transgender activism during the first two years of the Trump administration Drawing on extensive on the ground observation at the National Center for Transgender Equality Billard shows how these activists developed an unlikely blend of online and offline strategies to saturate a diverse ecology of national news outlets local and community media outlets across the country and both public and private conversations across multiple social media platforms with voices in support of their cause Moreover these activists navigated the complex flows of information and ideas among these different domains of the communication system as they worked to shape the national conversation on transgender rights As Billard argues this movement occurred at a very particular time in the development of the media system with new media shaping the movement in important ways that are both generalizable to other social movements and unique to transgender activism Including rich storytelling and insightful analysis *Voices for Transgender Equality* makes a compelling case of what it takes to make social and political change in a world transformed by digital media Along the way Billard provides key insights into the new business as usual of mediated politics and valuable lessons for more effective activism Trespassers? Disrupting D.C. Katie J. Wells, Kafui Attoh, Declan Cullen, 2025-10-28 A panoramic account of the urban politics and deep social divisions that gave rise to Uber The first city to fight back against Uber Washington D C was also the first city where such resistance was defeated It was here that the company created a playbook for how to deal with intransigent regulators and to win in the realm of local politics The city already serves as the nation s capital Now D C is also the blueprint for how Uber conquered cities around the world and explains why so many embraced the company with open arms Drawing on interviews with gig workers policymakers Uber lobbyists and community organizers Disrupting D C demonstrates that many share the blame for lowering the nation s hopes and dreams for what its cities could be In a sea of broken transit underemployment and racial polarization Uber offered a lifeline But at what cost This is not the story of one company and one city Instead Disrupting D C offers a 360 degree view of an urban America in crisis Uber arrived promising a new future for workers residents policymakers and others Ultimately Uber s success and growth was never a sign of urban strength or innovation but a sign of urban weakness and low expectations about what city politics can achieve Understanding why Uber rose reveals just how far the rest of us have fallen

When the Smoke Cleared Kyla Sommers, 2023-04-25 Echoing James Forman Jr s Locking Up Our Own a riveting story of race civil rights and rebellion in Washington DC In April 1968 following the murder of Martin Luther King Jr a wave of uprisings swept across America None was more visible or resulted in more property damage arrests or federal

troop involvement than in Washington DC where thousands took to the streets in protest against racial inequality looting and burning businesses in the process The nation s capital was shaken to its foundations When the Smoke Cleared tells the story of the Washingtonians who seized the moment to rebuild a more just society one that would protect and foster Black political and economic power A riveting account of activism urban reimagination and political transformation Kyla Sommers s revealing and deeply researched narrative is ultimately a tale of blowback as the Nixon administration and its allies in Congress thwarted the ambitions of DC s reformers opposing civil rights reforms and self governance And nationwide conservative politicians used the specter of crime in the capital to roll back the civil rights movement and create the modern carceral state A vital chapter in the struggle for racial equality When the Smoke Cleared is an account of open wounds paths not taken and their unforeseen consequences revealed here in all of their contemporary significance **Before**

Gentrification Tanya Maria Golash-Boza,2023-09-05 Draws a direct line between redlining incarceration and gentrification in an American city This book shows how a century of redlining disinvestment and the War on Drugs wreaked devastation on Black people and paved the way for gentrification in Washington DC In Before Gentrification Tanya Maria Golash Boza tracks the cycles of state abandonment and punishment that have shaped the city revealing how policies and policing work to displace and decimate the Black middle class Through the stories of those who have lost their homes and livelihoods Golash Boza explores how DC came to be the nation s murder capital and incarceration capital and why it is now a haven for wealthy White people This troubling history makes clear that the choice to use prisons and policing to solve problems faced by Black communities in the twentieth century instead of investing in schools community centers social services health care and violence prevention is what made gentrification possible in the twenty first Before Gentrification unveils a pattern of anti Blackness and racial capitalism in DC that has implications for all US cities *Black in Place* Brandi Thompson

Summers,2019-09-09 While Washington D C is still often referred to as Chocolate City it has undergone significant demographic political and economic change in the last decade In D C no place represents this shift better than the H Street corridor In this book Brandi Thompson Summers documents D C s shift to a post chocolate cosmopolitan metropolis by charting H Street s economic and racial developments In doing so she offers a theoretical framework for understanding how blackness is aestheticized and deployed to organize landscapes and raise capital Summers focuses on the continuing significance of blackness in a place like the nation s capital how blackness contributes to our understanding of contemporary urbanization and how it laid an important foundation for how Black people have been thought to exist in cities Summers also analyzes how blackness as a representation of diversity is marketed to sell a progressive cool and authentic experience of being in and moving through an urban center Using a mix of participant observation visual and media analysis interviews and archival research Summers shows how blackness has become a prized and lucrative aesthetic that often excludes D C s Black residents *Black Food Matters* Hanna Garth,Ashanté M.
