## **Car Sick Solutions For Our Car Addicted Culture:**

Car Sick Lynn Sloman, 2006 This book is about de motorisation It explains how it is working and presents different application that we can find in different cities of the world It says that we need to change the way we think about traveling that we need to move away from a car centred to a people centred society

*Car* Gregory Votolato, 2015-06-15 Whether you drool over their horsepower or decry their emissions the car is an important and ubiquitous part of nearly all of our lives And the history of their design and the innovations of their technologies can tell us a lot about how our values and attitudes have changed In this book Gregory Votolato shows us how and why the automobile has become since its rise in the late nineteenth century at once an object of unparalleled popular desire and a hugely problematic emblem of the modern world Votolato explores the ways that our love hate relationship with the car has been intimately connected with car design He tells the story of the rise of the private passenger car and all the psychological social and economic functions it has come to serve beyond mere transportation Introducing readers to the automotive design process he traces the lifecycle of the car from the drawing board to the scrapyard offering insights from key figures in the industry as well as a careful evaluation of the car's enormous environmental impact At the same time he looks at the many cultures tied into the automobile from drag racing and customizing to the luxury coachcraft of the classic era Along the way he takes us for a ride in some of the most famous cars ever to have had their tires inflated from the Model T to the Tesla The result is a top down thrilling burn through the history of one of our most beloved and lamented inventions

**The Routledge Handbook of Mobilities** Peter Adey, David Bissell, Kevin Hannam, Peter Merriman, Mimi Sheller, 2014-01-10 The 21st century seems to be on the move perhaps even more so than the last With cheap travel and more than two billion cars projected worldwide for 2030 And yet all this mobility is happening incredibly unevenly at different paces and intensities with varying impacts and consequences to the extent that life on the move might be actually quite difficult to sustain environmentally socially and ethically As a result mobility has become a keyword of the social sciences delineating a new domain of concepts approaches methodologies and techniques which seek to understand the character and quality of these trends This Handbook explores and critically evaluates the debates approaches controversies and methodologies inherent to this rapidly expanding discipline It brings together leading specialists from range of backgrounds and geographical regions to provide an authoritative and comprehensive overview of this field conveying cutting edge research in an accessible way whilst giving detailed grounding in the evolution of past debates on mobilities It illustrates disciplinary trends and pathways from migration studies and transport history to communications research featuring methodological innovations and developments and conceptual histories from feminist theory to tourist studies It explores the dominant figures of mobility from children to soldiers and the mobility impaired the disparate materialities of mobility such as flows of water and waste to the vectors of viruses key infrastructures such as logistics systems to the informal services of megacity slums and the important mobility events around which our world turns

from going on vacation to the commute to the catastrophic disruption of mobility systems The text is forward thinking projecting the future of mobilities as they might be lived transformed and studied and possibly brought to an end International in focus the book transcends disciplinary and national boundaries to explore mobilities as they are understood from different perspectives different fields countries and standpoints This is an invaluable resource for all those with an interest in mobility across disciplinary boundaries and areas of study

**Boy Racer Culture** Karen Lumsden,2013-02-11 On the public roads boy racers are a foreboding presence viewed with suspicion and derision by the respectable motorist The problem of the young male driver is one which has plagued authorities and governments due to youths acclaimed propensity to engage in deviant and dangerous driving behaviours Boy Racer Culture sheds light on the boy racer phenomenon through ethnographic research with the notorious Bouley Basher culture in the city of Aberdeen Scotland and the moral panic on the part of outside groups including the local community police politicians and media This book examines the creation of masculine and feminine identities in a traditionally male dominated subculture through car related rituals such as modding subcultural media and events and the quest for celebrity status via public performances Boy Racer Culture challenges common misconceptions surrounding the boy racer the problematic young male motorist and the car modifier It will be essential reading for an international audience including sociologists and criminologists particularly those with an interest in youth culture subcultures moral panics car culture anti social behaviour and the governance and policing of the roads

**The Mobilities Paradigm** Marcel Endres,Katharina Manderscheid,Christophe Mincke,2016-05-12 Over the last two decades the conceptualisation and empirical analysis of mobilities of people objects and symbols has become an important strand of social science Yet the increasing importance of mobilities in all parts of the social does not only happen as observable practices in the material world but also takes place against the background of changing discourses scientific theories and conceptualisations and knowledge Within the formation of these mobilities discourses the social sciences constitute a relevant actor Focussing on mobility as an object of knowledge from a Foucauldian perspective rather than a given entity within the historical contingency of movement this book asks How do discourses and ideologies structure the normative substance social meanings and the lived reality of mobilities What are the real world effects of on the will and the ability to be mobile And how do these lived realities in turn invigorate or interfere with certain discourses and ideologies of mobility

The Economical Environmentalist Prashant Vaze,2009-12-01 Reducing your carbon emissions in an economic down turn can be challenging but saving the planet doesn t have to cost you more Tough economic times need not relegate concerns for the planet to the back burner The author is an environmental economist trying to live a low carbon life in London He worked for 15 years in the UK s Office of Climate Change the Prime Minister s Strategy Unit and the Department of the Environment So far so good But he has kids A family to visit in India A hectic job In distilling and building on his own experience of trying to live a low carbon life he helps us navigate the choices that confront us all families singletons

pensioners when making decisions about what to eat what to buy how to travel and how to keep warm in the era of climate change and economic turmoil He works out the sums and lets us know which choices will make the biggest difference and which are false savings His book is an irreverent but seriously rigorous reference guide to low cost low carbon living for everyone in any location in tough times It s brimming with up to date information on current and future technologies tips and ideas for every budget on how to spend the least for the biggest carbon reduction gain and insight from the experiences of people trying to live low carbon lives

**Driverless Cars: On a Road to Nowhere?** Christian Wolmar,2020-09-24 Wolmar s entertaining polemic sets out the many technical legal and moral problems that obstruct the path to a driverless future and debunks many of the myths around that future s purported benefits

**Factor Five** Ernst Ulrich Weizsäcker,Charlie Hargroves,Michael H. Smith,Cheryl Desha,Peter Stasinopoulos,2009 The 21st century will see monumental change Either the human race will use its knowledge and skills and change the way it interacts with the environment or the environment will change the way it interacts with its inhabitants In the first case the focus of this book we would see our sophisticated understanding in areas such as physics chemistry engineering biology planning commerce business and governance accumulated over the last 1 000 years brought to bear on the challenge of dramatically reducing our pressure on the environment The second case however is the opposite scenario involving the decline of the planet s ecosystems until they reach thresholds where recovery is not possible and following which we have no idea what happens For instance if we fail to respond to Sir Nicolas Stern s call to meet appropriate stabilisation trajectories for greenhouse gas emissions and we allow the average temperature of our planets surface to increase by 4.6 degrees Celsius we will see staggering changes to our environment including rapidly rising sea level withering crops diminishing water reserves drought cyclones floods allowing this to happen will be the failure of our species and those that survive will have a deadly legacy In this update to the 1997 International Best Seller Factor Four Ernst von Weizsäcker again leads a team to present a compelling case for sector wide advances that can deliver significant resource productivity improvements over the coming century The purpose of this book is to inspire hope and to then inform meaningful action in the coming decades to respond to the greatest challenge our species has ever faced 6 that of living in harmony with our planet and its other inhabitants Publisher s description

*Ecotopia 2121* Alan Marshall,2016-10-04 A 2016 Green Book Festival Future Forecasts Winner A stunningly original lushly illustrated vision for a Green Utopia published on the 500th anniversary of the original Big Idea Five hundred years ago a powerful new word was unleashed upon the world when Thomas More published his book Utopia about an island paradise far away from his troubled land It was an instant hit and the literati across Europe couldn t get enough of its blend of social fantasy with a deep desire for a better world Five hundred years later Ecotopia 2121 once again harnesses the power of the utopian imagination to confront our current problems among them climate change and offer a radical alternative vision for the future of our troubled planet Depicting one hundred cities around the globe from New York to San

Francisco London Tokyo Sydney Rio de Janeiro Mexico City Beijing Vienna Singapore Cape Town Abu Dhabi and Mumbai  
 Alan Marshall imagines how each may survive and prosper A striking full color scenario painting illustrates each city The  
 chapters tell how each community has found either a social or technological innovation to solve today s crises Fifteen  
 American cities are covered Around the world urban planners like to tailor scenarios for the year 2020 to take advantage of  
 the metaphor of 20 20 vision In Ecotopia 2121 the vision may be fuzzy but its sharp insights captivating illustrations and  
 playful storytelling will keep readers coming back again and again     *Referencing and Understanding Plagiarism* Kate  
 Williams, Mary Davis, 2017-06-16 This concise and user friendly guide explains why referencing is an essential part of good  
 writing and shows students how to reference correctly It also develops students understanding of what plagiarism is and how  
 they can avoid it in their work Featuring clear explanations and examples throughout this book will help students to draw on  
 the work of others in their field in a responsible and ethical way This is an indispensable resource for all students that need  
 to get to grips with referencing New to this Edition Extensively revised and updated with new extracts and examples to  
 reflect changes in referencing norms and practices Features more advice on introducing quotations and citations Contains  
 even more examples of referencing from real students work across a range of disciplines     The Carbon-Free Home Stephen  
 Hren, Rebekah Hren, 2008 Having weaned themselves completely from fossil fuels in their conventional 1930s urban house  
 Stephen and Rebekah Hren provide a map for others to do the same Their book shows first how to reduce energy  
 consumption then to retrofit existing homes to obtain all heating cooling cooking refrigeration hot water and electricity from  
 renewable resources The Hrens also provide advice on sustainable low impact methods of transportation and home  
 gardening These practical approaches many of which are suitable for renters as well as owners fit anyone s budget and can  
 be implemented over time to progressively liberate a home from fossil fuel dependency COVER     **Transport,**  
**Environment And Society** Cahill, Michael, 2010-02-01 The environmental consequences of our transport system in the  
 shape of pollution and carbon emissions are well known Not so clear are the social consequences of contemporary transport  
 and mobility policy Readers are introduced to the complexity of the relationship between transport and society together with  
 the debates about the social inequalities produced by the transport system and the connection between social inequality  
 social exclusion and transport disadvantage This book explores the social inequalities which result from the ways we travel  
 connecting these to the key areas of social policy Reviewing the evidence on the social impact of transport the book discusses  
 the ways in which a sustainable transport policy could emerge     **David Suzuki's Green Guide** David Suzuki, David R.  
 Boyd, 2008 Everyone knows that the planet is in trouble but is there a solution This timely book identifies the most effective  
 ways individuals can be more green in four key areas home travel food and consumerism It also describes how citizens can  
 ensure that governments take the actions necessary to make sustainable lifestyles the norm instead of the exception  
 Environmental lawyer David Boyd and celebrated ecologist David Suzuki provide vital tips for choosing a home creating a

healthy indoor environment and decreasing energy and water use and utility bills They discuss what readers can do to drive and fly less profile the most environmentally friendly transportation choices and explain how to purchase carbon credits among other suggestions In addition they offer simple changes individuals can make in their diet to eat fresher tastier healthier food Included too is invaluable advice about how to buy fewer things and avoid toxic consumer products

**The Limits to Travel** David Metz, 2012 As affluence grows it gets easier to travel faster and further But research shows that despite this the average travel time in all societies remains steady at roughly an hour a day The implication is that people are choosing to increase the distance they regularly travel rather than opting for shorter journey times While this clearly offers advantages in terms of reaching more desirable locations the disadvantages are numerous not least that of anthropogenic climate change to which transport is the fastest growing contributor However the stability of travel time does not form part of the present conceptual framework of transport policy makers and professionals consequently misconceived decisions lead to unintended outcomes In this intriguing book David Metz examines the inadequacies inherent in the current thinking along with the resulting problems such as pollution congestion and noise He highlights the impact of the rapid increase in car use in China and India and explores the general travel experience public vs private transport and transport technology In considering to what extent travel could be avoided he arrives at a new paradigm to underpin sustainable transport policies based on the fundamental characteristics of human mobility and focusing on quality not quantity of travel Visit the Limits to Travel website at <http://www.limitstotravel.org.uk>

**Environment, Development, and Sustainability** Gordon Wilson, Pamela Furniss, Richard Kimbowa, 2010 Case studies from technologists engineers natural and social scientists and practitioners present multiple perspectives on sustainable development Examples from both developing and developed countries show how environment development and sustainability intertwine to form an issue of truly global concern

**Two Wheels** Matt Seaton, 2012-06-05 Cycling is going through a revolution Over half a million of us take to our bicycles every day and as a result the public image of cycling has been transformed No longer the preserve of the marginal and eccentric few it is now considered cool to travel on two wheels Guardian journalist Matt Seaton is one of cycling's greatest advocates An out and out bike nut he rides to work during the week races at the weekend and has even been known to attend transport policy conferences in between In this collection Seaton not only explores a nation's rediscovered love of cycling he also investigates the issues that affect all cyclists from potholes and town planning to cycling etiquette and aesthetics Whether you're a commuter or a competitive racer a recreational rider or a cycle tourist this book will prove irresistible and enlightening reading

**Elements of Sustainable Architecture** Rosa Urbano Gutiérrez, Laura de la Plaza Hidalgo, 2019-12-06 For sustainable architecture to become a reality the way we design buildings needs to change Many architects are concerned that sustainable technologies may interfere with a building's aesthetic appearance and so these are often added on once the design process is complete Elements of Sustainable Architecture solves this dilemma by helping students to develop the

design skills they need to create sustainable buildings ensuring that ecological considerations are applied throughout the design process Restoring the primacy of aesthetics and creativity to sustainable design the book focuses on strategies that have the greatest impact on building design It also shows the influence of sustainability considerations on choices about aspects such as composition form space tectonics materials colour textures proportion and position Specifically designed to offer a new way of understanding architecture the book introduces students to the basic principles and methods of sustainable design features current examples and inspiring case studies to support learning step by step presents information in a visually appealing intuitive easy to understand way includes over 500 high quality colour diagrams drawings sketches and photographs A clear visual introduction to creating aesthetically beautiful and sustainable buildings this is essential reading for students in sustainable architecture courses

*What is the Future?* John Urry, 2016-09-06 Thinking about the future is essential for almost all organizations and societies States corporations universities cities NGOs and individuals believe they cannot miss the future But what exactly is the future It remains a mystery perhaps the greatest mystery especially because futures are unpredictable and often unknowable the outcome of many factors known and unknown The future is rarely a simple extrapolation from the present In this important book John Urry seeks to capture the many efforts that have been made to anticipate visualize and elaborate the future This includes examining the methods used to model the future from those of the RAND Corporation to imagined future worlds in philosophy literature art film TV and computer games He shows that futures are often contested and saturated with different interests especially in relation to future generations He also shows how analyses of social institutions practices and lives should be central to examining potential futures and issues such as who owns the future The future seems to be characterized by wicked problems There are multiple causes and solutions long term lock ins and complex interdependencies and different social groups have radically different frames for understanding what is at stake Urry explores these issues through case studies of 3D printing and the future of manufacturing mobilities in the city and the futures of energy and climate change

**Understanding the Environment and Social Policy** Tony Fitzpatrick, 2011-02-09 Providing a much needed overview of environmentalism and social policy the book will be invaluable reading for students teachers activists practitioners and policy makers Book Jacket

**American Empire and the Canadian Oil Sands** George A. Gonzalez, 2016-04-08 Throughout the US oil and gas shale are being hydrofracked to produce petroleum and natural gas Oil or tar sands from Canada is being processed thereby generating large amounts of crude This book places the unconventional fossil fuels revolution that is taking place in North America within the context of great power politics
