DESCRIPTION

CARDOX Bulk Low Pressure Carbon Dioxide Storage Units are available in models with storage ranges from 2.75 U.S. tons to 60 U.S. tons of liquid Carbon Dioxide. These storage units incorporate design, construction and testing in accordance with ASME (American Society of Mechanical Engineers) Boiler & Pressure Vessel Code, Section VIII, Division 1, Pressure Vessels.

These storage units (horizontal or vertical) provide a compact suppression system footprint protecting facilities.

A 4-in. minimum, thick polyurethane layer sheathed inside an aluminum outer jacket insulates the steel pressure vessel. A factory fitted low-temp air-cooled, providing maximum reliability, refrigeration package chills the CO₂ to approximately 0°F (-17°C) at 300-psi (20.6 bar). The refrigeration package is available in a variety of voltages, which offers global compatibility with local power requirements.

The insulation scheme and refrigeration package provides efficient continuous duty operation, affording reduced facility overhead.

As a standard factory configuration, each storage unit arrives at the project site outfitted with dual safety relief valves and dual 6-in diameter gauges for pressure and liquid level indication.

The Factory Mutual approval certifies that these storage units are built to the highest specification and quality standards.

CARDOX Bulk Low Pressure Carbon Dioxide Storage Units offers best in class storage capacity, refrigeration package options, temperature range and lightweight construction.
