be given before the cord has come off How should the bath be given It should not be given sooner than one hour after  
feeding The room should be warm if possible there should be an open fire The head and face should first be washed and  
dried then the body should be soaped and the infant placed in the tub with its body well supported by the hand of the nurse  
The bath should be given quickly and the body dried rapidly with a soft towel but with very little rubbing At what  
temperature should the bath be given For the first few weeks at 100 F later during early infancy at 98 F after six months at  
95 F during the second year from 85 to 90 F With what should the bath be given Soft sponges are useful for bathing the body  
limbs and scalp There should be a separate wash cloth for the face and another for the buttocks What are the objections to  
bath sponges When used frequently they become very dirty and are liable to cause infection of the eyes mouth or genital  
organs Under what circumstances should the daily tub bath be omitted In the case of very feeble or delicate infants on  
account of the exposure and fatigue and in all forms of acute illness except by direction of the physician In eczema and many

**American Babies** Elizabeth A. Reedy, 2007-10-30 The focus of this book is the journey babies have made over the past century The rise of the middle class in America dictated major changes in the ways babies were fed cared for and raised Social programs focused on improving water and sanitation programs for all which led directly to decreased infection among infants and improved morbidity and mortality rates Other programs also focused attention on babies Advances in medicine allowed infants to be immunized against once deadly and disabling diseases and to survive congenital defects premature birth and infectious disease Physicians helped infertile couples conceive and carry a baby to term Prenatal care helped mothers give birth to a healthy baby Early intervention services gave infants an advantage as they faced growing up in the modern era Today most American babies are better off than they were in 1901 Overall they are bigger healthier and much more likely to survive the first year But challenges remain By reviewing the events of the past century Reedy hopes we can make even more of a difference in the lives of American babies in the century to come In 1900 most babies were born at home Infant mortality was high and most families could expect to lose one or more of their babies within the first year of life A family was expected to have babies and they were certainly wanted in most situations however they did not generally receive the attention they do today In the early years of the 21st century the birth of a baby is a time of joy for most parents and extended families Birth occurs most often in a hospital delivery room with the father and sometimes other family members present While the infant mortality rate in the United States still lags behind many other developed countries it has significantly improved over the past century and infant death is not a family expectation The main focus of this book is the journey babies have made over

the past century The rise of the middle class in America dictated major changes in the ways babies were fed cared for and raised No longer a financial necessity as in an agrarian society babies became a symbol of middle class prosperity and parents basked in the reflected glow Social programs authorized and regulated by federal and state government became a reality Progressive Era reformers focused on improving water and sanitation programs for all which led directly to decreased infection among infants and improved the dismal morbidity and mortality rates prevalent among all social classes Other programs such as the Shepard Towner Act the Social Security Act and Lyndon Johnson s Great Society initiatives also focused attention on babies Advances in medicine allowed infants to be immunized against once deadly and disabling diseases and to survive congenital defects premature birth and infectious disease Physicians discovered the means to help infertile couples conceive and carry a baby to term Prenatal care helped mothers prepare for the birth of a healthy baby Early intervention services by educators social workers and others gave infants an advantage as they faced growing up in the modern era At the beginning of the 21st century most American babies are better off than they were in 1901 Overall they are bigger healthier and much more likely to survive the first year But challenges remain By reviewing the events of the past century Reedy hopes we can make even more of a difference in the lives of American babies in the century to come
