

# CAPTURE THE FLAG

A TEAM GAME FOR SUMMER FUN AT SUMMER CAMPS,  
ADVENTURE ACTIVITY WEEKENDS AND EVEN FOR TERRIFIC  
ENJOYABLE SUMMER ACTION IN YOUR OWN NEIGHBOURHOOD

BASED ON THE GAME PLAYED AT CAMP HALF-BLOOD IN PERCY JACKSON AND THE LIGHTNING THIEF BY RICK RIORDAN

## YOU WILL NEED

- Eight or more people divided into two teams
- Two flags
- Open space. For example:
  - ✓ A house with a large front and back garden, or two equally large sides
  - ✓ A play park
  - ✓ A village green
  - ✓ Heathland
  - ✓ A paintball course
  - ✓ Woodland, especially with a stream in the middle
  - ✓ A large field
- The more space to run around in, the better – and key to the game is finding a suitable place for your flag. Added to this, natural or man-made (see workshop ideas Page 5) obstructions and obstacles will allow you to hide as you advance – hide, creep, dash, crawl, slither towards your competitor's territory and watch for their flag, while avoiding being tagged and captured.

- A physical marker of the central border line – it is often easiest to use a natural line like the edge of a house or anything that lines up with several trees or a thin stream. However, if there are no natural dividing lines, a string line or even a chalk line along the ground or a line of backpacks or trees, branches or cones could also work well.
- A map that marks the location of each team's pickup area and the central border line between both teams' territory. See example on the left.

**Hamlet on the Holodeck, updated edition** Janet H. Murray, 2017-04-07 An updated edition of the classic book on digital storytelling with a new introduction and expansive chapter commentaries I want to say to all the hacker bards from every field gamers researchers journalists artists programmers scriptwriters creators of authoring systems please know that I wrote this book for you Hamlet on the Holodeck from the author s introduction to the updated edition Janet Murray s Hamlet on the Holodeck was instantly influential and controversial when it was first published in 1997 Ahead of its time it accurately predicted the rise of new genres of storytelling from the convergence of traditional media forms and computing Taking the long view of artistic innovation over decades and even centuries it remains forward looking in its description of the development of new artistic traditions of practice the growth of participatory audiences and the realization of still emerging technologies as consumer products This updated edition of a book the New Yorker calls a cult classic offers a new introduction by Murray and chapter by chapter commentary relating Murray s predictions and enduring design insights to the most significant storytelling innovations of the past twenty years from long form television to artificial intelligence to virtual reality Murray identifies the powerful new set of expressive affordances that computing offers for the ancient human activity of storytelling and considers what would be necessary for interactive narrative to become a mature and compelling art form Her argument met with some resistance from print loyalists and postmodern hypertext enthusiasts and it provoked a foundational debate in the emerging field of game studies on the relationship between narrative and videogames But since Hamlet on the Holodeck s publication a practice that was largely speculative has been validated by academia artistic practice and the marketplace In this substantially updated edition Murray provides fresh examples of expressive digital storytelling and identifies new directions for narrative innovation
