**Cambodian Architecture, Eighth to Thirteenth Centuries** Jacques Dumarçay, Pascal Royère, 2018-12-24 The first part of this study covers the technical economic and site constraints of the famous ancient Khmer monuments as well as the architectural concepts and decoration of the structures It becomes clear that the realization of the plans was occasionally thwarted by technical limitations The second part considers the buildings proper focusing first on pre Angkorean architecture and the structures at Roluos It then considers in turn the important shrines of Pre Rup Tak Keo the Bapuon and Angkor Wat and concludes with a survey of the architecture from the reign of Jayavarman VII and wooden structures of the thirteenth century The book also considers the historical and social context of these monuments forming a clear expression of early Khmer society

*Southern Vietnamese Modernist Architecture* Mel Schenck, 2020-04-21 Southern Vietnamese Modernist Architecture features beautiful architectural photography that illustrates the outstanding accomplishment of the people of southern Vietnam in developing a mid century modernist architecture that is extraordinary in the world Especially for Americans Vietnam has been a war instead of a country The world didn't notice that the Vietnamese were simultaneously constructing modern apartment buildings houses large public buildings and public housing as they developed a new nation And the world didn't anticipate that this architecture would be so overtly modernist rather than an adaption of traditional Vietnamese designs to the continuation of colonial architecture In the mid twentieth century southern Vietnamese architects developed a version of modernist architecture that accommodated the tropical climate and reflected the identity of a newly independent culture It demonstrates the innate sense of design of Vietnamese and it represented the outlook of the people of southern Vietnam as they looked towards the future even in the face of war The vast quantity and quality of Vietnamese modernist buildings constructed throughout southern Vietnam made Vietnam an unrecognized center of modernism in the world Most importantly the southern Vietnamese as a culture embraced modernism and it became the vernacular architecture of the culture for dwellings This architecture features an interplay between masses and voids that provides a much more vibrant version of modernist architecture This style fills the gaps between the functionalism of the International Style and the quest for identity and spirit that has been lacking in modernism worldwide American architect Mel Schenck is a long term immigrant to Vietnam and has been studying this architecture since he was surprised by the extent and quality of modernist architecture in Saigon when he first lived there in 1971-72 He and photographer Alexandre Garel accumulated a database of 400 buildings and 4 000 photographs in southern Vietnam to serve a comprehensive analysis of the history and characteristics of this distinctive architecture Architectural historians aficionados of modernist architecture and anyone interested in Vietnamese culture will find that this book is a positive story about Vietnamese aspirations for independence

and the value of modernist architecture in living in the world today      **The Architecture of Empire** Gauvin Alexander Bailey, 2022-09-23 Most monumental buildings of France's global empire such as the famous Saigon and Hanoi Opera Houses were built in South and Southeast Asia. Much of this architecture and the history of who built it and how has been overlooked. The Architecture of Empire considers the large scale public architecture associated with French imperialism in seventeenth and eighteenth century India, Siam, and Vietnam, and nineteenth and twentieth century Indochina, the largest colony France ever administered in Asia. Offering a sweeping panorama of the buildings of France's colonial project, this is the first study to encompass the architecture of both the ancien régime and modern empires from the founding of the French trading company in the seventeenth century to the independence and nationalist movements of the mid twentieth century. Gauvin Bailey places particular emphasis on the human factor: the people who commissioned, built, and lived in these buildings. Almost all of these architects, both Europeans and non-Europeans, have remained unknown; beyond at best their surnames. Through extensive archival research, this book reconstructs their lives, providing vital background for the buildings themselves. Much more than in the French empire of the Western Hemisphere, the buildings in this book adapt to indigenous styles regardless of whether they were designed and built by European or non-European architects. The Architecture of Empire provides a unique, comprehensive study of structures that rank among the most fascinating examples of intercultural exchange in the history of global empires.

**World and Its Peoples** , 2007 Most of what is known about the outside world remains superficial and stereotypical. World and Its Peoples: Eastern and Southern Asia brings a long rich story to light about ethnic groups, the impact of terrain and natural resources, and the influence of history. This unique reference work maps out how the nations of the modern world became what they are today through photographs of the geography and people of foreign lands, through discussion of ancient and contemporary works of art and events, and through scores of maps detailing geographical features, historic and modern places, natural habitats, rainfall, locations of ethnic and linguistic groups, natural resources, and centers of industry and transportation. No single resource assembles such comprehensive insight into the world and the people who live in it.

**Cambodge** Penny Edwards, 2007-02-28 This strikingly original study of Cambodian nationalism brings to life eight turbulent decades of cultural change and sheds new light on the colonial ancestry of Pol Pot's murderous dystopia. Penny Edwards recreates the
