The Cambridge Primary Review Research Surveys Robin Alexander, Christine Doddington, John Gray, Linda Hargreaves, Ruth Kershner, 2012-08-06 The Cambridge Primary Review Research Surveys is the outcome of the Cambridge Primary Review England's biggest enquiry into primary education for over forty years. Fully independent of government, it was launched in 2006 to investigate the condition and future of primary education at a time of change and uncertainty and after two decades of almost uninterrupted reform. Ranging over ten broad themes and drawing on a vast array of evidence, the Review published thirty-one interim reports including twenty-eight surveys of published research provoking media headlines and public debate before presenting its final report and recommendations. This book brings together the twenty-eight research surveys specially commissioned from sixty-five leading academics in the areas under scrutiny and now revised and updated to create what is probably the most comprehensive overview and evaluation of research in primary education yet published. A particular feature is the prominence given to international and comparative perspectives. With an introduction from Robin Alexander, the Review's director, the book is divided into eight sections covering children's lives and voices, school, home and community, children's development, learning, diversity and needs, aims, values and contexts for primary education, the structure and content of primary education, outcomes, standards and assessment in primary education, teaching in primary schools, structures and processes, teaching in primary schools, training, development and workforce, reform, policy, frameworks, governance, funding, reform and quality assurance. The Cambridge Primary Review Research Surveys is an essential reference tool for professionals, researchers, students and policy makers working in the fields of early years, primary and secondary education.

Assessing Learning in the Primary Classroom Sandra Johnson, 2012-03-12 Why is assessment so important in the teaching/learning process? How should we assess pupils in the primary classroom? *Assessing Learning in the Primary Classroom* is an accessible introduction to the concepts critical to a professional understanding of this vital aspect of a teacher's role. It comprehensively considers the principles underpinning effective assessment, the different forms it can take and the different purposes it serves both within and beyond the classroom. Linking the latest research and theory with examples of assessment in the classroom, it considers key issues such as: Why we assess; How we assess; How we ensure quality in assessment; validity and reliability; Assessment internal and external to the school; Statutory assessment throughout the primary school; Local, national and international assessment; Using assessment results in pupil, teacher, school and system evaluation. *Assessing Learning in the Primary Classroom* is for all students undertaking their PGCE, those working at masters level and experienced teachers who wish to broaden their understanding of both the value and pitfalls of educational assessment.

The Mechanics of Progress in Education Alain Mingat, Jee-Peng Tan, 1998. Explores the relation between national wealth and various aspects of educational development. Examines the underlying sources of differences in education among rich and poor countries and considers directions for policy development in the sector particularly in the context of lower income countries. Based on data from a database prepared by the Institut de Recherche sur l'Economie de l'Education IREDU, Université de Bourgogne, Dijon, France, compares education in rich and poor countries in 1975 and 1993.

Socioculturally Responsive Assessment Randy E. Bennett, Linda Darling-Hammond, Aneesh Badrinarayan, 2005-05-01. Socioculturally Responsive Assessment assembles the best available thinking from within and outside the educational measurement community about the theoretical foundations and systems level policy implications of formal assessment programs designed to be socioculturally responsive. Synthesized from culturally responsive assessment design and practices, culturally relevant pedagogy, and funds of knowledge, universal design for learning, the learning sciences, and other literatures, this emerging concept affirms that students' learning and performance is inextricably tied to the social, cultural, and linguistic contexts in which they live and develop knowledge. Across four sections, this book provides an argument and initial evidence for impact on students, users, and assessment quality; offers guidance for implementation; and examines the potential limitations, pitfalls, barriers, and measurement issues that such programs will inevitably raise. Scholars, teaching faculty, test developers, and policymakers will come away with integral foundations, new assessment approaches, and a greater sense of the potential for positive impact that these assessments may afford.
