Teacher Expertise in the Global South Jason Anderson, 2023-06-01 There are many expert teachers working in the global South and we can learn a great deal from them Neither of these claims should be surprising yet to date there has been almost no research conducted on expert teachers working in Southern contexts Instead the huge sums of money invested in attempting to improve teacher quality in the South have frequently been directed towards introducing exogenous practices or interventions that may be culturally inappropriate practically infeasible and ultimately unsustainable often failing as a result In this pioneering book Jason Anderson provides an authoritative overview of the practices cognition and professionalism of expert teachers working in low income contexts By drawing upon both systematic reviews of teacher expertise and effectiveness research and his own fieldwork in India he argues that without an understanding of expert teachers working in all contexts worldwide we cannot truly understand expertise itself

The Construction of English J. Gray, 2010-09-29 This book takes the view that ELT global coursebooks in addition to being curriculum artefacts are also highly wrought cultural artefacts which seek to make English mean in highly selective ways and it argues that the textual construction and imaging of English parallels the processes of commodity promotion more generally
