Transmission Pipeline Calculations and Simulations Manual E. Shashi Menon, 2014-12-27 Transmission Pipeline Calculations and Simulations Manual is a valuable time and money saving tool to quickly pinpoint the essential formulae equations and calculations needed for transmission pipeline routing and construction decisions The manual s three part treatment starts with gas and petroleum data tables followed by self contained chapters concerning applications Case studies at the end of each chapter provide practical experience for problem solving Topics in this book include pressure and temperature profile of natural gas pipelines how to size pipelines for specified flow rate and pressure limitations and calculating the locations and HP of compressor stations and pumping stations on long distance pipelines Case studies are

based on the author's personal field experiences Component to system level coverage Save time and money designing pipe routes well Design and verify piping systems before going to the field Increase design accuracy and systems effectiveness

Pump User's Handbook Heinz P. Bloch, Allan R. Budris, 2004-07-13 A valuable reference Pump User's Handbook Life Extension explains just how and why the best of class pump users are consistently achieving superior run lengths low maintenance expenditures and unexcelled safety and reliability The book conveys in detail what must be done to rapidly accomplish best of class performance and low life cycle cost Simply put the text explains what exactly needs to be done if a facility wants to progress from being a one two or three year pump MTBF plant and wishes to join the leading money making facilities that today achieve a demonstrated pump MTBF of 8.6 years Written by two practicing engineers whose combined 80 year working career included all conceivable facets of pumping technology book provides experience based details data guidance direction explanations and firm recommendations Implementing what this text explains will allow a plant to move from yesterday's demonstrably unprofitable and costly repair focus to tomorrow's absolutely necessary reliability focus
