films and museums for the sole purpose of promoting creationism Moreover a brief look at the creationist movement in Germany provided a powerful comparison to the United States and elucidated the key components necessary for a creationist movement to exist and flourish namely the presence of fundamentalist willing to fight to get anti evolutionary materials introduced into science classrooms This study provides new insights into the creationist phenomenon present not only in the United States but also increasingly present in European countries such as Germany Understanding the detrimental link between creationism and science education will help the science community realize that this topic needs to be continually readdressed and that it is imperative that these creationist trends are not dismissed as inconsequential     *Bookseller* ,1876
