**The Common Camp** Irit Katz, 2022-08-09 Seeing the camp as a persistent political instrument in Israel Palestine and beyond The Common Camp underscores the role of the camp as a spatial instrument employed for reshaping controlling and struggling over specific territories and populations Focusing on the geopolitical complexity of Israel Palestine and the dramatic changes it has experienced during the past century this book explores the region's extensive networks of camps and their existence as both a tool of colonial power and a makeshift space of resistance Examining various forms of camps devised by and for Zionist settlers Palestinian refugees asylum seekers and other groups Irit Katz demonstrates how the camp serves as a common thread in shaping lands and lives of subjects from across the political spectrum Analyzing the architectural and political evolution of the camp as a modern instrument engaged by colonial and national powers as well as those opposing them Katz offers a unique perspective on the dynamics of Israel Palestine highlighting how spatial transience has become permanent in the ongoing story of this contested territory The Common Camp presents a novel approach to the concept of the camp detailing its varied history as an apparatus used for population containment and territorial expansion as well as a space of everyday life and subversive political action Bringing together a broad range of historical and ethnographic materials within the context of this singular yet versatile entity the book locates the camp at the core of modern societies and how they change and transform

**The Urbanism of Exception** Martin J. Murray, 2017-03-10 This book challenges the

conventional modernist inspired understanding of urbanization as a universal process tied to the ideal typical model of the modern metropolis with its origins in the grand Western experience of city building At the start of the twenty first century the familiar idea of the city or urbanism as we know it has experienced such profound mutations in both structure and form that the customary epistemological categories and prevailing conceptual frameworks that predominate in conventional urban theory are no longer capable of explaining the evolving patterns of city making Global urbanism has increasingly taken shape as vast distended city regions where urbanizing landscapes are increasingly fragmented into discontinuous assemblages of enclosed enclaves characterized by global connectivity and concentrated wealth on the one side and distressed zones of neglect and impoverishment on the other These emergent patterns of what might be called enclave urbanism have gone hand in hand with the new modes of urban governance where the crystallization of privatized regulatory regimes has effectively shielded wealthy enclaves from public oversight and interference

Camping Grounds Phoebe S.K. Young, 2021-04-01 An exploration of the hidden history of camping in American life that connects a familiar recreational pastime to camps for functional needs and political purposes Camping appears to be a simple proposition a time honored way of getting away from it all Pack up the car and hit the road in search of a shady spot in the great outdoors For a modest fee reserve the basic infrastructure a picnic table a parking spot and a place to build a fire Pitch the tent and unroll the sleeping bags Sit under the stars with friends or family and roast some marshmallows This book reveals that for all its appeal the simplicity of camping is deceptive its history and meanings far from obvious Why do some Americans find pleasure in sleeping outside particularly when so many others past and present have had to do so for reasons other than recreation Never only a vacation choice camping has been something people do out of dire necessity and as a tactic of political protest Yet the dominant interpretation of camping as a modern recreational ideal has obscured the connections to these other roles A closer look at the history of camping since the Civil War reveals a deeper significance of this American tradition and its links to core beliefs about nature and national belonging Camping Grounds rediscovers unexpected and interwoven histories of sleeping outside It uses extensive research to trace surprising links between veterans tramps John Muir African American freedpeople Indian communities and early leisure campers in the nineteenth century tin can tourists federal campground designers Depression era transients family campers backpacking enthusiasts and political activists in the twentieth century and the crisis of the unsheltered and the tent based Occupy Movement in the twenty first These entwined stories show how Americans camp to claim a place in the American republic and why the outdoors is critical to how we relate to nature the nation and each other

**Dissonant Heritages and Memories in Contemporary Europe** Tuuli Lähdesmäki, Luisa Passerini, Sigrid Kaasik-Krogerus, Iris van Huis, 2019-08-13 This open access book discusses political economic social and humanitarian challenges that influence both how people deal with their past and how they build their identities in contemporary Europe Ongoing debates on migration on local national inter and transnational levels prove that it is a divisive issue with regards to understanding European integration and identity At the same time the European Union increasingly invests in projects related to European heritage museums and cultural memory networks while having to take dissonant heritages into account These processes in their combination offer an interesting dynamic and form the complex puzzle that poses challenging questions for anyone involved in academic research heritage practices and policy debates With this puzzle at its core this book explicitly focuses on slippery and transforming notions of Europe and critically discusses ongoing and transforming power structures of heritage and memory in today s Europe The book combines theoretical and methodological contributions to the debates on European heritage and memory studies and in depth analyses of empirical case studies Its main aim is to bring research fields concerning memory and heritage into a closer dialogue and thus explore the cultural and political dynamics of contemporary Europe

Protest Camps Anna Feigenbaum, Fabian Frenzel, Patrick McCurdy, 2013-10-10 From Tahrir Square to Occupy from the Red Shirts in Thailand to the Teachers in Oaxaca protest camps are a highly visible feature of social movements activism across the world They are spaces where people come together to imagine alternative worlds and articulate contentious politics often in confrontation with the state Drawing on over fifty different protest camps from around the world over the past fifty years this book offers a ground breaking and detailed investigation into protest camps from a global perspective a story that until now has remained untold Taking the reader on a journey across different cultural political and geographical landscapes of protest and drawing on a wealth of original interview material the authors demonstrate that protest camps are unique spaces in which activists can enact radical and often experiential forms of democratic politics

*Making Home(s) in Displacement* Luce Beeckmans, Alessandra Gola, Ashika Singh, Hilde Heynen, 2022-01-17 Making Home s in Displacement critically rethinks the relationship between home and displacement from a spatial material and architectural perspective Recent scholarship in the social sciences has investigated how migrants and refugees create and reproduce home under new conditions thereby unpacking the seemingly contradictory positions of making a home and overcoming its loss Yet making home s in displacement is also a spatial practice one which intrinsically relates to the fabrication of the built environment worldwide Conceptually the book is divided along four spatial sites referred to as camp shelter city and house which are approached with a multitude of perspectives ranging from urban planning and architecture to anthropology geography philosophy gender studies and urban history all with a common focus

on space and spatiality By articulating everyday homemaking experiences of migrants and refugees as spatial practices in a variety of geopolitical and historical contexts this edited volume adds a novel perspective to the existing interdisciplinary scholarship at the intersection of home and displacement It equally intends to broaden the canon of architectural histories and theories by including migrants and refugees spatial agencies and place making practices to its annals By highlighting the political in the spatial and vice versa this volume sets out to decentralise and decolonise current definitions of home and displacement striving for a more pluralistic outlook on the idea of home

**The Interiors Theory Primer** William Mangold, 2025-07-31 In a world where life is increasingly defined by the spaces we inhabit understanding interiors is essential to understanding ourselves The Interiors Theory Primer maps the intellectual terrain of interior design and spatial experience introducing readers to key concepts that shape how people occupy interior spaces Organized into three parts this book begins with foundational concerns such as place identity materiality and atmosphere and then examines the boundaries and expertise of the discipline before turning to critical and emerging topics like biophilia virtuality and social justice Each chapter presents a focused literature review of a major theme in interiors theory supported by key design precedents and suggestions for further reading Drawing on a wide range of scholarship The Interiors Theory Primer offers a coherent framework for understanding interiors as a distinct interdisciplinary field deeply embedded in the human condition Accessible to students useful to professionals and provocative for scholars The Interiors Theory Primer argues that the designed environments in which we live work and gather deserve greater attention not only for their aesthetic and functional
