Robb,2002-01-15 Annotation This book highlights the significant role the poor can play in analyzing poverty developing interventions for poverty reduction and evaluating the effect of projects and policies *Can the Poor Influence Policy?*

Caroline M. Robb,1999 Participatory Poverty Assessments PPAs use participatory research methods to understand poverty from the perspective of the poor by focusing on their realities needs and priorities The principle of a PPA is to ensure that the intended beneficiaries have some control over the research process Communities share their knowledge and are involved in analyzing the results This book proposes a threefold classification of PPAs based on their varying impacts 1 deepening our understanding of poverty 2 influencing policy and 3 strengthening policy implementation There is no single model for PPAs However this book suggests some minimum standards and good practice for participatory policy research that aims to affect policy change PPAs are highlighting the potentially powerful role the poor can play in analyzing poverty developing interventions for its reduction and assessing the impact of projects and policies The challenge for the Bank and the rest of the development community is to effectively integrate the perspectives and values of the poor into the process of policy and project formulation and implementation *Social Policy in a Developing World* Rebecca Surender,Robert

Kende-Robb,2003-02-01 The objective of this paper is to present some early experiences of poverty and social impact analysis PSIA from the PRGF supported programs in the African Department The paper illustrates that many staff country reports have taken a first step toward PSIA by making more explicit the links between poverty and policies Various examples highlight that even though relationships can be complex and analysis as a result may not be definitive it is possible to assess

some of the potential poverty effects even in countries with limited data and therefore contribute to a more informed policy debate and design The paper concludes that PSIA can help design policies that are more pro poor better define appropriate compensatory and complementary measures where appropriate and support country ownership of reforms by promoting a public debate on trade offs between policy choices In light of this the paper proposes that PRGF policy advice would benefit from more systematic PSIA and that staff country reports could report more on the potential policy trade offs and poverty outcomes based on PSIA

*The Impact of Economic Policies on Poverty and Income Distribution* François Bourguignon, Luiz A. Pereira da Silva, 2003 Development is about fundamental change in economic structures about the movement of resources out of agriculture to services and industry about migration to cities and international movement of labor and about transformation in trade and technology Social inclusion and change change in health and life expectancy in education and literacy in population size and structure and in gender relations are at the heart of the story The policy challenge is to help release and guide these forces of change and inclusion But how can policymakers assess whether what they have done or what they are doing is right Since the 1970s public economics has placed the serious analysis of growth at the center of its agenda It has shown how to integrate growth and distribution in simple terms the size of the cake and the distribution of the cake rigorously into the discussion of public policy both theoretically and empirically

*Ideas for Development* Robert Chambers, 2013-06-17 The many ideas and opportunities include narrowing the gaps between words and actions reducing demands on administrative capacity using minimum rules non negotiables and downward accountability to transform power relations finding new potentials for participation improving scaling up critical reflection and experiential learning complementing rights based with obligations based approaches pro poor realism and responsible well being

*Inclusive Aid* Leslie Groves,Rachel Hinton,2013-06-17 Rapid and profound changes are taking place in international development The past two decades have promoted the ideals of participation and partnership yet key decisions affecting people s lives continue to be made without sufficient attention to the socio political realities of the countries in which they live Embedded working traditions vested interests and institutional inertia mean that old habits and cultures persist among the development community Planning continues as though it were free of unpredictable interactions among stakeholders This book is about the need to recognise the complex non linear nature of development assistance and how bureaucratic procedures and power relations hinder poverty reduction in the new aid

environment The book begins with a conceptual and historical analysis of aid exposing the challenges and opportunities facing aid professionals today It argues for greater attention to accountability and the adoption of rights based approaches In section two practitioners policy makers and researchers discuss the realities of power and relationships from their experiences across sixteen countries Their accounts from government donors and civil society expose the highly politicised and dynamic aid environment in which they work Section three explores ways forward for aid agencies challenging existing political institutional and personal ways of working Authors describe procedural innovations as strategic ways to leverage change Breaking the barriers to ensure more inclusive aid will require visionary leadership and a courageous commitment to change Crucially the authors show how translating rhetoric into practice relies on changing the attitudes and behaviours of individual actors Only then is the ambitious agenda of the Millennium Development Goals likely to be met The result is an indispensable contribution to the understanding of how development assistance and poverty reduction can be most effectively delivered by the professionals and agencies involved
