Evolutionary Ideas Sam Tatam,2022-05-10 When faced with new challenges it's easy to feel our solutions need to be equally unprecedented We think we need a revolution But what if this is a big mistake In Evolutionary Ideas Sam Tatam shows how behavioural science and evolutionary psychology can help us solve tomorrow's challenges not by divining something the world has never seen but by borrowing from yesterday's solutions often in the most unexpected ways Just as millions of years of evolution have helped craft the wing and dorsal fin thousands of engineers designers marketers and advertisers have toiled to solve many of the problems you face today Over time through intent design social learning and sheer luck we have found what works Armed with an enhanced ability to see these patterns in human innovation we can now systematically approach the creative process to develop more

effective ideas more readily and rapidly In the same way Japanese engineers reduced bullet train noise by studying the evolved biology of the owl and kingfisher today we can see how Disney improved the queueing experience in the same way Houston airport made arrivals feel faster while making people walk further We ll learn how the chocolate at the bottom of a Cornetto ice cream can improve an Error 404 message and what a bowl of M Ms has in common with a canary in a coal mine These are Evolutionary Ideas Exploring five of the most critical challenges we face today we learn how to breed more effective solutions from those that have survived The result is a dynamic and exciting way of solving problems and supercharging creativity for anyone in any endeavour Leadership is Half the Story Marc Hurwitz,Samantha

Hurwitz,2015-01-01 Can you imagine a choreographer only training one dancer to lead while his or her partner sits in the lobby staring at the wall Yet we do this all the time in organizations Half the partnership is missing Leadership is Half the Story introduces the first model to seamlessly integrate leadership followership and partnerships This research backed field tested book contributes many new ideas and practical advice for everyone in an organization from CEO to HR director to front line manager to consultant All of us lead not just those with the formal title All of us follow not just front line staff In great collaborations one moment we are leading and then we flip to following in other words the relationship between leadership and followership is dynamic context specific and ever evolving This empowering perspective opens up leadership to everyone normalizes followership and enables more productive and innovative collaborations Candid discussions about both roles allow for better coaching mentoring skill development and interpersonal agility and result in stronger teams Marc and Samantha Hurwitz give us a category busting book that practically glows with energy and vision according to Marshall Goldsmith executive coach and best selling author of What Got You Here Won t Get You There **The Last Mile** Dilip

Soman,2015-07-27 Most organizations spend much of their effort on the start of the value creation process namely creating a strategy developing new products or services and analyzing the market They pay a lot less attention to the end the crucial last mile where consumers come to their website store or sales representatives and make a choice In The Last Mile Dilip Soman shows how to use insights from behavioral science in order to close that gap Beginning with an introduction to the last mile problem and the concept of choice architecture the book takes a deep dive into the psychology of choice money and time It explains how to construct behavioral experiments and understand the data on preferences that they provide Finally it provides a range of practical tools with which to overcome common last mile difficulties The Last Mile helps lay readers not only to understand behavioral science but to apply its lessons to their own organizations last mile problems whether they work in business government or the nonprofit sector Appealing to anyone who was fascinated by Dan Ariely s Predictably Irrational Richard Thaler and Cass Sunstein s Nudge or Daniel Kahneman s Thinking Fast and Slow but was not sure how those insights could be practically applied The Last Mile is full of solid concrete advice on how to put the lessons of behavioral science to work
