Torkildsen's Sport and Leisure Management Rob Wilson, Chris Platts, Daniel Plumley, 2012-04-27 For nearly thirty years George Torkildsen's classic textbook has been the most comprehensive and engaging introduction to sport and leisure management available to students at all levels. Now in a fully revised sixth edition it is still the only textbook that covers all the key topics taught within contemporary sport and leisure management courses. This new edition includes expanded coverage of the practical managerial skills that students must develop if aiming for a career in the sport and leisure industry from planning and managing people to marketing and entrepreneurship. It includes five completely new chapters on leisure in the home, financial management, quality management and law and enterprise reflecting important developments in contemporary sport and leisure. This edition retains the hallmark strengths of previous editions including in-depth discussion of the social and cultural context of sport and leisure, full analysis of the public, private and voluntary sectors and a review of key products and services including sport tourism, the arts, play and leisure in the natural environment. Richly illustrated throughout with up-to-date evidence, data, case studies and international examples, each chapter also contains a range of useful pedagogical features such as discussion questions, practical tasks and structured guides to further reading and resources. For the first time a dedicated companion website offers additional teaching and learning resources for students and lecturers. Visit the companion website at www.routledge.com/textbooks/taylor

Drowning By Accident explains why it is so easy to drown where accidents happen and how to save lives by early rescue and resuscitation More than 600 people die by drowning in Britain every year Swimming is promoted as a particularly safe form of exercise so that swimmers forget or ignore the dangers of frigid lakes swollen rivers incoming tides or outgoing rip currents Drowning accidents take place because we don't recognise water as a hostile environment We overestimate the strength and endurance of our bodies and underestimate the power and deceptiveness of water Year after year victims lose their lives in typical drowning accidents often sinking so quickly and silently that nearby family friends and onlookers fail to notice the tragedy taking place close beside them Babies drown in baths Toddlers drown in garden ponds School children fall off rafts Teenagers strike too far from the shore Pensioners wade into rivers to save their dogs Victims often die within minutes of sinking beneath the surface A quarter of those who reach hospital alive will also die while others survive with severe permanent brain damage This means that it is vitally important for parents grandparents teachers lifeguards and lawmakers to recognise the risks and prevent drowning accidents before they take place **Transactions of the**
