

The book cover features a dark blue world map in the background. Overlaid on the map are several white geometric lines, including a prominent red line forming a triangle and other lines with small circles at their intersections. At the bottom of the cover is a photograph of the Stonehenge monument in a grassy field under a blue sky.

Ebook Sacred Geometry Earth Monuments Mountains:

Sacred Geometry of the Earth Mark Vidler, Catherine Young, 2016-01-22 Identifies the patterns of our planet's design within the natural landscape Explains the geometry inherent in the mountains and coasts on all continents Reveals how ancient monuments were built to reflect and enhance the Earth's design often connecting sites around the world Includes detailed maps that show the simple geometrical relationships among the world's mountains coastlines islands and ancient monuments From continent to continent across the globe Mark Vidler and Catherine Young reveal that order is everywhere on Earth On remote islands soaring summits and level deltas they unveil natural topographic patterns related to pi the golden ratio and right triangle geometry And as the planet's design emerges it becomes clear that this hidden order in nature decided the location of ancient monuments the world over Through detailed maps Vidler and Young show how the locations of megalithic monuments reflect and enhance a natural pattern on the Earth that connects its major features The rows of standing stones at Carnac in France for example point to the summits of Mount Everest and K2 and Angkor Wat in Cambodia is on a straight line joining Mount Kilimanjaro in Africa and the tip of Cape Comorin in India The authors examine the geography of many islands and each continent including Antarctica to show how the highest peak on each landmass falls on a line connecting coastal extremes They reveal how circles of standing stones and man made mounds mark intersections of these lines They explore the connection between the Nazca lines in Peru and the Amazon Nile and Ganges deltas and explain how the locations of the Giza pyramids Stonehenge and Machu Picchu are integrated into the natural design on Earth As they uncover geometric patterns on the Earth line by line point by point the authors reveal how the world's ancient monuments represent a form of transglobal communication that far predates the written word **Earth-keeper** Tyberonn, 2007-01-01

The Sacred Mountains J. T. Headley, 1847

Sacred Number and the Lords of Time Richard Heath, 2014-05-14 An exploration of sacred geometry space and time encoded in stone structures during four successive ages of megalithic building Examines the sacred knowledge carefully preserved in the Stone Age structures of Carnac Stonehenge Giza and Teotihuacan Shows how our Stone Age ancestors created a practical system of mathematics sophisticated enough to discern cycles lasting up to thousands of years Reveals how the Earth's shape and proportions mirror the time cycles of the heavens above Our Stone Age ancestors discovered that the geometry of the Earth provided a sacred connection between human experience and the spiritual worlds Exploring the numerical patterns of time and then the size and shape of the Earth they created an exact science of measures and preserved their discoveries within sacred structures spiritualized landscapes and mythologies which interpreted the religious ideas associated with their science In this way the ancient measures of space and time reached our present age and still embody the direct but forgotten truths of our sacred planet By recovering the megalithic secrets of space and time carefully preserved in megalithic stone structures Richard Heath tells an untold story of four megalithic ages He identifies a first age

of astronomical discovery in the French sites around Carnac where using only counted lengths and simple geometries the ancients created a sophisticated cosmic clockwork A second age centered in Britain and including Stonehenge successfully measured the Earth and revealed a simple pattern held within the Earth's shape using metrological ratios A third age centered in Egypt and Greece saw a perfecting of the monumental arts associated metrology and religious ideas revealing the Earth and the heavens as the work of a numerical genius The fourth age saw pyramids and other metrological buildings spread to the New World at Teotihuacan in Mexico and also to the Far East Examining Earth's harmonic relevance to the Universe as a whole Heath shows how we can recognize the long forgotten foundations of our own civilization and revive the sacred teaching preserved by the four great megalithic ages

The Dimensions of Paradise Luis B. Vega, 2013-06 The purpose of this book is to investigate and ascertain the possible geographical location of the Garden of Eden The presumption is that certain locations in the Middle East as in temples ziggurats pyramids and cities both ancient and modern have been built perhaps on the very ley lines of the dimensions of Paradise itself This study assumes that Paradise had existed geographically if the Bible account of the Genesis is to be taken literally Although the topic of the Garden of Eden has a multitude of possible themes to consider only certain aspects relevant to the theory of its geography will be considered and discussed in a conceptual way

The Sacred Mountains... Joel Tyler Headley, 2004-01-01

The Geometry & Astronomy of Gobekli Tepe Arturo Villamarin, 2020-05-18 In this third installment of the search for a sensible rationale for the existence of monuments whose designs have intrigued humanity over the centuries the author challenges his previous findings and expands his analysis to include one of the most enigmatic of ancient monuments Gobekli Tepe This new study takes us beyond the traditional musings regarding the sun and the moon shadows interplay with ancient structures by providing geometric and astronomical analysis based on analytical data collected in the last five years The challenge to his own data and analysis brings him to the discovery and proof of the role the solar system played in the design alignment location and possibly the time in history the monuments were designed Gobekli Tepe and other sites tell that story

Sacred Geometry in Ancient Goddess Cultures Richard Heath, 2024-01-30 Examines the ancient cosmic science of the female megalithic astronomers Describes the shared sacred geometry and astronomy knowledge in the megalithic monuments temples and secret calendars of the matrilineal cultures of Malta Gobekli Tepe and the Minoans of Crete Shows how early Christians helped preserve ancient science by encoding it in the rock cut churches of the Cappadocia region of Turkey Explains how Greek myths reveal the transition from matriarchy to patriarchy Long before Pythagoras and Plato before arithmetic and Christianity there existed matrilineal societies around the Mediterranean led by women with a sophisticated understanding of astronomy and sacred science In this detailed exploration Richard Heath decodes the cosmological secrets hidden by ancient goddess centered cultures on the island of Malta at Gobekli Tepe in Turkey and on the Greek island of Crete Heath reveals how the female astronomers of Malta built megaliths to study the sun

moon and planets counting time as lengths and comparing lengths using geometry He shows how they encoded their cosmological and astronomical discoveries their astronomy of the goddesses in the geometries of their temples and monuments Examining Maltese and Cretan artifacts including secret calendars he details how the Minoans of Crete transformed Maltese astronomy into a matriarchal religion based upon a Saturnian calendar of 364 days He also reveals evidence of the precursors of Maltese astronomical knowledge in the monuments of Gobekli Tepe Looking at the shift from sacred geometry to arithmetic in ancient Mediterranean cultures the author parallels this change in mindset with the transition from matriarchal to patriarchal cultures He reveals how Greek myths present a way to see the matriarchal past through patriarchal eyes detailing how Saturn s replacement by Jupiter Zeus symbolizes the transition from matriarchy to patriarchy The author examines how the early Christians helped preserve the ancient astronomy of the goddesses due to its connections to Christ s cosmological teachings by encoding it in the artwork of the rock cut churches and monasteries of the Cappadocia region of Turkey Revealing how our planet with its specific harmonics and geometries within our star system is uniquely designed to support intelligent life the author shows how this divine spiritual truth was known to the ancient astronomers
