Mortal City Peter Lang, 1995 Urban violence increasingly dominates our day to day existence we watch footage of the earthquake in Japan the bombing of Chechnya the war in Bosnia and not so long ago the same year that war broke out in Bosnia we watched the horror of the Los Angeles riots As events in Sarajevo and Los Angeles demonstrate these crises continue without imminent resolutions The very definitions of the city and of violence are constantly being revised the city is no longer a fixed site but has hemorrhaged across real and imagined space while violence has moved beyond the traditional arenas of social conflict to pervade daily life Proceedings of the ACSA Annual Meeting Association of Collegiate Schools of Architecture, 2005 Subject Guide to Books in Print, 1997 **Chaos Fractals Models**, 1998 Avery Index to Architectural Periodicals Avery Library, 1995 **Progressive Architecture**, 1995 **American Book Publishing Record**, 1999 **Forthcoming Books** Rose Arny, 1999 **Planning for a Material World** Laura Lieto, Robert A. Beauregard, 2015-11-06 Today urban scholars think of cities and regions as evolving through networks of human associations technologies and natural ecologies This being the case planners are faced with the task of navigating a profoundly material world Planning with and for humans alone is unacceptable in the unfolding of urban processes non human things cannot be ignored This inclusive vision has consequences for how planners envision the connections among norms technologies and life worlds as well as how they design and implement their plans The contributors to this volume utilize a variety of examples ecologically sensitive regional planning in Naples Italy congestion pricing in New York City and public participation in Europe among others to explore how planners engage a heterogeneous and restless world Inspired by assemblage thinking and actor network theory each chapter draws on this new materialism to acknowledge in quite pragmatic ways that spatial politics is a process of becoming that is inseparable from the materiality of urban practices **Urban Design Ecologies** Brian McGrath, 2013-01-14 Der Urban Design Ecologies Reader stellt Architekten und Stadtplanern wichtige Tools zum besseren Verständnis heutiger städtebaulicher Maßnahmen bereit Essays führender Experten spannen den Bogen zwischen historischen Entwicklungen und innovativen Ansätzen zur Bewältigung der globalen Herausforderungen rasanter Urbanisierungsprozesse und des Klimawandels Die neuesten Ansätze in den Bereichen Stadtentwicklung darunter Kernkonzepte wie Stadtarchitektur Architektur großer Metropolen Stichwort Großarchitektur Wucherung der Städte Megastädte oder die informelle Stadt und Metastädte die von digitalen Technologien und dem ökologischen Gedanken getragen werden werden im Detail erörtert Eco-Friendly Community Development Baijayanti Mehrotra, 2025-01-24 Over the past few decades global progress has brought prosperity to many but at a significant cost to the environment As resource consumption reaches unprecedented levels the world faces challenges like resource depletion pollution and climate change threatening the planet's sustainability Eco Friendly Community Development provides a comprehensive guide to building sustainable communities through the principles of sustainable consumption and production SCP This book explores real

Futures Bob Sheil,Frédéric Migayrou,Luke Pearson,Laura Allen,2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture Despite numerous developments in technological manufacture and computational design that provide new grounds for designers the act of drawing still plays a central role as a vehicle for speculation There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation Drawing Futures will present a compendium of projects writings and interviews that critically reassess the act of drawing and where its future may lie Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments The book coincides with an international conference of the same name taking place at The Bartlett School of Architecture UCL in November 2016 Bringing together practitioners from many creative fields the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas On Arrows Laurent Stalder,2025-01-21 A series of original essays on the history of British postwar architecture through the concept of performance and the ubiquitous but elusive image of the arrow In the 1950s the figure of the arrow had a strange kind of ubiquity in architectural drawings publications and advertisements symbolizing everything from the circulation of cold and warm air in a kitchen fridge to the flow of traffic in assorted New Towns Twenty five years earlier there were barely any arrows within architectural publications and 15 years later they had all but disappeared In On Arrows Laurent Stalder looks back at the near past to trace the idea of performance in architecture by following this pervasive yet relatively unnoticed figure within the history of British architecture During its short intense period of use the arrow pointed beyond any one singular author typology or scale to the operative dimension of architecture and its environments working both as an appropriate representational technique and a concrete tool for design Stalder uses the arrow to move through the different dimensions of performance mapping out the changing set of constellations that made up postwar British architecture and its environments the constructive aspects structural properties infrastructural innovations spatial challenges as well as their aesthetic and practical consequences It is the arrow he writes that brings together debates from within different disciplines from building physics to sociology structural design and historiography inscribed as they are in the materials spaces and buildings that are all too often considered in isolation from one another **Verzeichnis lieferbarer Bücher** ,1988
